COCA WINE.

THE valuable properties of the Coca leaf, though long known in South America as a stimulant in cases of excessive mental or bodily exertion, has only within the last few years been realized in this country.
Coca acts as a stimulant to the nervous and muscular systems. It has none of the ill effects of a Narcotic, and the appetite and digestion are not impaired by its use.
Coca Wine, as prepared by Kemp & Co., will be found the best and most agreeable form in which to take this valuable Drug.
Coca Wine may be taken alike by the strong and invalid with benefit. In sea-sickness it has been used with the most gratifying results.
Per bottle, Rs. 2-8.

FOR SALE BY AUCTION.

VALUABLE COFFEE ESTATES ON THE NILGIRIS.

The undersigned will offer the following well-known and first-class coffee estates for sale by auction in their Coonoor Office at 12 o'clock noon on 18th October, 1890.

LOUISIANA ESTATE.

About 10 miles from Coonoor near Kolacumbay consisting of 242 acres, of which 120 acres are planted with coffee and in bearing.
The estate is well found in cattle, tools &c, and is in good order. There is a good bungalow, cattle shed and pulp house.
Crop estimated at 10 to 12 tons.

LOWER TIGER ROCK ESTATE.

Two miles from Coonoor on the ghaut containing 60 acres of coffee in bearing and a large number of fruit trees yeilding a yearly income.
Well found in buildings and admirably situated for the supply of manure. Crop estimated at 8 to 10 tons.
The estate is in good order.

TUDOR VALLEY ESTATE.

Situated on the Nilgiris beyond Kolacumbay about 14 mile from Coonoor consisting of 94 acres of which 80 acres are planted with coffee, in full bearing and in first-rate order The estate is well supplied with buildings, cattle, tools &c.
From season 1882-83 to 89-90 the average crop has been 25 tons.
Owing to the very heavy crop of last year the ensuing crop will be about 8 tons—but prospects of a bumper next year.

For farther particulars apply to
T. STANES, & Co.,
Coimbatore.

FOR SALE.

A STRONG elegant Phaeton in excellent order, and a pair of fast-trotting Cabuli Horses. Believed sound. One carries a lady. Owner gone to England. Lot or separate. Apply to Mr. KIRKHAM, Char Bungalows, Poona.

BASEL GERMAN MISSION.
MANGALORE TILES.

A FEW REASONS WHY they enjoy a very wide popularity:—

They are guaranteed to be made of pure, unmixed Mangalore clay;

They are not reduced in value by admixture of different sorts of clay;

They are made by trained Europeans, and having undergone various improvements are by far and away the best roofing material either made or sold in this country;

They are so thoroughly dried and compressed that they effectually keep out rain and damp, and are light, durable, elegant, and cheap;

They are secured by Royal Letters Patent against worthless imitations.

I. O'CALLAGHAN,
General Tariffic Manager,
Bombay, September 20, 1890.

IN THE HIGH COURT OF JUDICATURE AT BOMBAY.
ORDINARY ORIGINAL CIVIL JURISDICTION.
SUIT No. 367 OF 1890.

RANJIWANDAS NATHOO and TRIBHOWAN NATHOO, both of Bombay, Hindoo Inhabitants, residing at Ganeswady, outside the Fort of Bombay .....Plaintiffs.
vs.
SHESCURAN DHARAMSEY of Bombay, Hindoo Inhabitant, residing at Mody Bay, within the Fort of Bombay .....Defendant.

PURSUANT to the FINAL DECREE made in the above suit, and bearing date the Twentieth day of March, one thousand eight hundred and ninety, the following leasehold property will be sold by Public Auction, before Charles Edward Fox, Esq., Commissioner of this Honourable Court at his office in the Court House, on WEDNESDAY, the First day of October, one thousand eight hundred and ninety, at the hour of three o'clock in the afternoon.

PARTICULARS.

All the estate and interest of the abovenamed Plaintiffs Pranjiwandas Nathoo and Tribhowandas Nathoo, and of the abovenamed Defendant Shescuran Dharamsey in all that piece or parcel of leasehold land together with the buildings standing thereon situate on the northern side of the Goa street on the Mody Bay Estate, in the Island of Bombay, in the registration sub-district of Bombay, and containing by admeasurement three hundred and forty-four square yards and fourtenths of a square yard and assessed by the Collector of Land Revenue under No. 8189 and by the Collector of Municipal assessment under Ward No. 2759 and Street No. 40 and bounded as follows:—that is to say on or towards the north by vacant ground belonging to the Port Trustees, on or towards the south by the said Goa Street, on or towards the east by the vacant land belonging to the said Trustees, and on or towards the west by the land leased to Hassam Meya Ahmed, and which said premises were formerly in the occupation of the abovenamed Defendant Shescuran Dharamsey and his tenants and are now partly in the occupation of the said Shescuran Dharamsey and partly in the occupation of Tribhowan Nathoo as Receiver appointed herein by this Honourable Court or his tenants.

For further particulars and conditions of sale application should be made at the office of the said Commissioner or at the office of Messrs. Thakurdas, Dharamsi and Cama, attorneys for the Plaintiffs abovenamed, No. 23 Rampart Row, Fort, Bombay.—Dated this 22nd day of August 1890.

CHARLES E. FOX,
Commissioner.

NOTICES.

BOMBAY PORT TRUST.

VESSELS ARRIVED.—The following vessels arrived on the 27th:—Arabia (s), from Karachi; Calder (s), Bussorah; and Busheer (s), Mormugao. Yesterday:—Bormida (s), from Hongkong; and H. M. S. Serapis, Portsmouth.

VESSELS SAILED.—The following vessels sailed on the 27th:—Pekin (s), for London, &c.; and Kilwa (s), Persian Gulf.

PRINCE'S DOCK.—The s.s. Wistow Hall and the s.s. Calder entered the dock on Friday and Saturday, respectively.

VICTORIA DOCK.—The s.s. Pekin left the dock on Saturday.

I. M. RAILWAY.—The traffic return for the week ending 20th September, 1890, shows a decrease of Rs. 32,411, in receipts.

FOOTBALL BY MOONLIGHT.—There will be a moonlight game for the Rovers' Football Club, at 9 p.m., to-day, on the Cooperage. All members are requested to attend.

LEOPARDS FOR SALE.—Three young leopards were brought by one Fakroodin Ally Mahomed by train to Grant Road Station, on Saturday morning, in a cage, and were taken to the Arthur Crawford Markets for sale.

THEFT OF ORNAMENTS.—Ragoojee Jetha, residing at Broach Street, reports the theft of sundry gold and silver ornaments, of the collective value of Rs. 168, from a box, during his absence from home on Friday afternoon last.

A BOY ENTICED AWAY AND ROBBED.—Diabhoy Jewanchund, residing at Shaik Memon Street, reports that his son, aged nine years, was enticed away to Cazeepoora from his residence, by a Bhattia, who took off two gold bangles and a silver waist-chain, collectively valued at Rs. 60, and absconded, on Friday last.

BOMBAY ART SOCIETY.—As will be seen from the advertisement, which appears elsewhere, the Bombay Art Society have issued their prospectus for the exhibition of pictures, sculpture, and photography, that is to be held in February next. Prospectuses will be forwarded on application by post-card to the honorary secretary.

SERIOUS SCALDING ACCIDENT.—Rama Mahadoo, a Hindoo, while working on Saturday, at a boiler at the Nursoo Mlecher Mill, Colaba, was scalded severely on the face, shoulders, and chest by the steam suddenly escaping from the boiler. He was taken to the G. T. Hospital.

ANNIVERSARY OF THE DEATH OF ARCHBISHOP PORTER.—On Thursday next, the 2nd October, a solemn Requiem Mass will be celebrated in the Cathedral, Kalbadevi, for the repose of the soul of the late revered Archbishop, the Most Rev. Dr. Porter, S.J. The Mass, at which the Right Rev. Dr. Beider Linden, S.J., Bishop of Poona, is to officiate, will commence at 7 a. m.

MUSIC AT THE YACHT CLUB.—The Band of the 4th Bombay Rifles will play the following programme at the Yacht Club this evening, at 5-45 p.m.:—

Lancers.....Faust up to date .....Lutz.
Gavotte.....Entrancing .....Boggetti.
Fantasia .....The Rose of Castille...Balfe.
Valse.....La Gitana.....Bucalossi.
Fantasia .....Folk Songs of Italy ...Rampezzotti.
Valse.....Katrina .....Ostlere.
Polka.....My Queen of Hearts...Toski.

FRAUDULENT POSSESSION OF PROPERTY.—At the Girgaum Police Court on Saturday, Inspector Greyhurst charged Gopinath Ramchunder before Mr. Richardson, with having in his possession two pairs of gold-plated bangles, valued at Rs. 40, on the 18th July last, reasonably suspected to have been stolenor fraudulently obtained, and failing to render a satisfactory account how he came by the same. The accused was convicted, and on his admitting three previous convictions, was sentenced to three months' rigorous imprisonment.

THE FEAST OF TABERNACLES.—To-day and to-morrow the Jewish offices will be closed for business on account of the festival known as above. It was instituted as a memorial of the ancient Jews having dwelt in tents for forty years during the passage through the wilderness. In commemoration of this incident the Jews erect booths or arbours, constructed of the branches and leaves of trees, in the compound of their residences, and take their meals thereunder. This morning they will carry branches of date trees and citrons to the synagogue, where they have prayers.

SUICIDE.—An inquest was held by the Coroner yesterday, at the J. J. Hospital, respecting the death of Mussana De Souza, aged 50 years, a toddy-drawer, who lived at Dadur. Some years ago he met with an accident and injured his knee severely, which prevented him from doing his work, and in consequence became much depressed in mind. On Saturday night about 8-30 he was found lying unconscious near the Dadur distillery, apparently suffering from the effects of opium, when he was removed to the hospital, where he died about an hour after admission. A verdict of suicidal death by opium was recorded.

RECREATION CLUB DANCE.—On Friday evening, a dance was given by the above club, in the hall of the Mechanics' Institute, Parel, B. B. and C. I. Railway. Judging from the numbers that attend these monthly dances, and the great distances some come from for the occasion, they seem to be very popular, and great credit is due to Mr. D'Mello, the master of ceremonies, and the committee of management, for the great pains they take to afford those who attend the dances, an enjoyable evening. A well-arranged programme of over 20 dances was gone through, and before the last of the guests had departed, the clock had run well into the small hours of the morning.

THE TRADE-JARK COUNTERFEIT CASE.—Before Mr. Cooper on Friday, at the Esplanade Police Courts, the case in which Jeevan Chuttoo, who carried on business in dyes, was charged by Manilal Damjee with making use of false trade-marks on similar packets, purporting to have been imported from Switzerland, was resumed for hearing. During the course of the hearing of the case, it was subsequently changed into one of cheating in respect of the same property. His Worship, in looking through the evidence, came to the conclusion that the prosecution had not tendered sufficient evidence to warrant a conviction of the accused, who was accordingly acquitted. His Worship directed that the complainant should pay Rs. 270 of the costs incurred by the defendant.

FATAL FALL FROM A BALCONY.—An inquest was held by the Coroner yesterday, at the Goculdas Tejpal Hospital, respecting the death of a Hindoo child, aged 2½ years, named Mohanjee Tricamdas. About 4-30 p.m. on Saturday, deceased went on the balcony of the house on the third story, Bazaar Gate Street, where his parents lived, and immediately after fell over into the street. It appears one of the wooden railings of the balcony had fallen out, and the deceased is supposed to have fallen through the space between the bars. Deceased was picked up unconscious bleeding from a wound on the forehead. He was removed to the hospital, where he died an hour after admission. The verdict was "that the death of Mohanjee Tricamdas was caused by fracture of the base of the skull, the result of an accidental fall from the balcony of the third story of a house."

SUICIDE OF A YOUNG WIDOW.—An inquest was held by the Coroner, on Saturday, at Mughbat, respecting the death of a young woman, named Saloo, aged 20 years. Deceased, who lived with her mother Godoo, was a widow for the last 6 years, and kept boarders. Deceased quarrelled with her mother frequently, because she refused to give her a gold ornament that she wanted. On Thursday last the mother threatened to send her to her country, upon which Saloo became sulky, and would not speak to her. On Friday night after going to bed deceased became very sick, and a native doctor, who was sent for, pronounced it a case of poisoning. About 10 a.m., on Saturday, she became worse, and Dr. S. W. Kane was sent for. She was able to speak, however, and told the doctor, that she had had taken arsenic, and described the quantity as 20 or 30 grains. Dr. Kane treated her, but she did not recover, and died at noon, on Saturday. The verdict was, "That the death of Saloo was caused by arsenic, which she voluntarily administered to herself."

CHEATING A CLOTH MERCHANT.—At the Girgaum Police Court on Saturday, Inspector Cobb brought up on remand, and charged Wullyjee Dossajee, a Borah, and Vully Mahomed *alias* Mahomed Ali Noorbhoy, also a Borah, before Mr. Richardson with cheating and aiding and abetting each other in the commission of the said offence, by dishonestly inducing Anant Sewjee, a cloth merchant, to deliver to him 78¼ yards of velvet, valued at Rs. 225-11, and promising to pay for the same to a servant of his, named Purshotum Vishnoo, who was to accompany the first accused to his house, and there to be paid; whereas he evaded the servant and absconded. The two accused were arrested under a warrant. Upon the evidence adduced accused No. 1, Vullyjee Dossajee, was convicted, and on his admitting three previous convictions was sentenced to two years' rigorous imprisonment. The accused No. 2, Vully Mahomed, was discharged as there was no evidence to implicate him, he being only present when the transaction took place between the first accused and the complainant.

REQUIEM SERVICE AT DABUL.—On Friday morning the 26th instant, a solemn Requiem Mass was sung in the Church of St. Francis Xavier at Dabul, as a last tribute to the memory of the Rev. Charles Boeslager, S.J., Professor of St. Xavier's College, from the Goan students who, in gratitude to the fatherly affection they experienced, dedicated to him this special service. On the evening of the same day, a solemn dirge was solemnised in the same church, when a large number of the priests, from both jurisdictions, were present, and also all the students of the College. The Rev. Fr. Meyer, Rector of St. Xavier's College, presided. A catafalque was raised in the body of the church, draped with black, and illuminated with large tapers and stud lights. With the special permission of the Bishop of Damaun the Rev. P. trocino Baretto, the Rector of the Anglo-Portuguese School, recited the funeral oration, in which he eulogised the high qualities of the deceased priest, and specially the fatherly affection he had always shown to the pupils. The rev. preacher dwelt much on the virtue of gratitude that, he said, gave evidence of the noble spirit with which the students were animated on the present occasion to honour the memory of one who had been dear to them. The Goan students had raised a subscription to defray the expenses of the religious service.

ARREST OF DESERTERS IN BOMBAY.

A RESPECTABLY-DRESSED European, named John Alfred Corbett, who described himself as a sergeant in the Commissariat Department at Madras, and doing duty in that city at the Commissariat Store-keeper General's branch, whose age, complexion, height of stature, and general appearance answered the description forwarded by the Madras authorities to Bombay for his apprehension, was placed before Mr. C. P. Cooper, the Chief Presidency Magistrate, on Saturday, at the Esplanade Police Court, in the custody of Constable Gray, and charged with desertion from the above department on the 20th instant. In the report forwarded to Bombay Sergeant Corbett was stated to have asked for leave of absence for one day from his immediate superior on the 20th instant on grounds of ill-health. The necessary leave being granted, the sergeant left his office, and went home. The reason for his disappearance originated in a quarrel with his wife, during which he became greatly excited, and proceeding to the Central Railway Station took out a second-class ticket for Bombay, where he arrived on the 22nd instant. Constable Gray, in the execution of the arrest, proceeded to the Imperial Hotel on the 26th instant, where the sergeant, who had engaged a room, gave his name as Mr. Kington, and the reasons which induced him to leave Madras. Prisoner, who expressed his willingness to return to that city and resume his duties, was ordered to be made over to the military authorities.

Another deserter, named George Frederick Miller, a private in her Majesty's Royal North Lancaster Regiment, was brought by Constable Paine before the Chief Presidency Magistrate, at the Esplanade Police Court. The prisoner, after joining his regiment at Quetta, proceeded with it to Mhow in 1886. After being stationed there for about three years, the next shift was made to Kampti. From here Miller was sent as a convalescent to Deolali, where he deserted on the 9th of September, and coming down to Bombay on the 23rd inst., joined a ship in the docks. The prisoner, who was evidently dissatisfied with the prospects of a sea-faring career, found his way to the Police Commissioner's Office, where he surrendered himself to justice. The Magistrate directed him to be handed over to the military authorities.

SHIPPING INTELLIGENCE.

THE Indian Marine steamer Clive, entered the Government Dock on Saturday last for repairs.

COMMERCIAL INTELLIGENCE

SATURDAY EVENING, SEPTEMBER 27.

THE increasing dearness of money in London, indicated by the advance in the Bank of England rate to 5 per cent. on Wednesday would appear to continue, Reuter's financial message of last evening reporting the serious fall of ½ per cent. in Consols, at 94⅞ ; Indian Sterling Loan being also ½ per cent. lower, at 106⅜. Thursday's enhanced quotation of 4½ per cent. was still the market rate of discount for short London Bills ; that, however, on six months' sight Indian Bank Paper coming ½ lower, at 4½ per cent. A further drop of 5-16d. per oz. took place in the price of Bar Silver at 51 11-16d. ; and in New York the metal was down ¾ cent. at 112, demand Exchange on London being unaltered. Rupee Securities in London were one per cent. lower in Fours, and 1⅛ in 4½ per cents., at £84½ and £86½, respectively. An extra allotment of four lakhs of Wire Transfers on Calcutta was made by the Indian Council yesterday, at 1s. 7 29-32d., which is 5-32d. above the rate obtained for Bills on Wednesday, and 3-32 more than the higher price paid for the extra allotments of the same on the following day. The Exchange Banks' buying rate on India, at 30 days' sight, remained at 1s. 7¼d. In Paris, French Rentes were ¼ per cent. lower, at 94½ ; Exchange on London was 1½ centime higher, at fcs. 25·31.

To-day's telegrams report Silver unchanged both in London and New York ; but Rupee Paper in London was again lower by ⅜ per cent. in Fours, at £83¾, and ⅛ in 4½ per cents. at £86⅝. The Banks' buying rate on India was put down ¼d., say to 1s. 7⅛d. Consols were unchanged ; but the market rate of discount, on short London Bills, was advanced ⅛ per cent., say to 4⅞ ; and Indian Sterling Loan was down ⅛ per cent. at 106⅜. A quarter of a million in Gold was withdrawn from the Bank of England for Portugal.

In General Produce, Linseed was dull at a further decline in Bombay Seed of 9d. per quarter in the spot price, and 6d. to arrive, the quotation in each position being now 45s. per quarter, ex-quay. Wheat also is called dull ; but we note an advance of ½d. per cental in No. 1 spot Soft White in Liverpool at 7s. 4½d. per cental ex-quay, other quotions couing unchanged. The total Wheat afloat for the United Kingdom yesterday was 2,010,000 quarters, or 140,000 quarters less than was upon the water a week ago.

Although the Liverpool Cotton Market generally remained firm in tone yesterday, and Surats steady, business was upon a smaller scale, the total Sales having aggregated 8.000 bales, inclusive of 1,000 Surats. 5 13-16d. per lb. was, however, still the price of spot Mid.-American Cotton, and in East Indian the only changes were on Tinnevelly and Coconada, which declined 1-16d. per lb. In American Arrivals there was a decline of 3-64d. for this month's deliveries at 5⅞d, but no change for September-October, while in all more distant positions there was an advance of 1-64d per lb., the quotation for Jan-Feb. being 5⅝d. per lb. The day's Imports were 21,000 bales. The Manchester Market was quiet but steady. This afternoon the Liverpool Market closed dull ; Surats quiet, the total Sales having reached only 6,000 bales, including 700 East Indian ; but prices were unaltered. The day's Imports were 6,000 bales.

Little change in the position of Cotton in Liverpool during the past week is disclosed by the statistics wired yesterday, the total Sales having been slightly more than for the previous six days, at 55,000 bales, while 1,000 bales more were forwarded to consumers, at 56,000 bales. The Imports, however, were 61,000 bales more than in the previous week, at 82,000 bales. The total Stock had become heavier by 23,000 bales, and showed yesterday an excess of 137,000 bales and of 271,000 bales, compared with the figures for last year, and the year before, respectively, at the same period. The Stock of Surats was virtually unchanged at 251,000 bales. The total Visible Supply had increased since the previous Friday by 136,000 bales, while of Surats there were 3,000 bales less in sight ; and compared with the figures which we give below for 1889 and 1888, yesterday's estimate shows an increase in the total supply of 324,000 bales, and 458,000 bales respectively, the increase in East Indian Cotton being 171,000 bales and 256,000 bales. No change in the spot value of American Cotton took place during the week ; but an advance of 5-64d. was established in Arrivals in all positions. Ready American was worth ⅞d. per lb. less than at the same time last year, and 3-16d. less than in 1888.

September Futures were 10 points lower in New York yesterday, at 10·20 cents ; but the spot price was unaltered at 10⅜ cents. The day's Receipts at the U. S. Ports were 35,000 bales, making the week's total larger than that for the corresponding week last year, and greatly in excess of that in 1888; the total arrivals since the opening of the new season showing an increase of 110,000 bales, compared with last year's *for the same period, and of* 281,000 bales as against those for the year before. *The total quantity in sight yesterday was* 10,630,000 bales, compared with 10,400,000 bales visible last *week.* Both spot and future prices were quite unchanged in New York *to-day. The Receipts at the* Ports were 33,000 bales, going against 37,000 bales last year, and 28,000 bales the year before.

The American crop figures to date give the following comparisons with the two previous seasons :—

	1890.	1889.	1888.
Week's receipts	212,000	192.000	128,000
" exports to U. K.	77,000	67 000	42,000
" " Continent	39,000	39,000	10,000
Total receip's since 1st Sept. '90.	581,000	471,000	393,000
" exports to U. K. do.	293,000	147,000	109,000
" " to Continent do.	57,000	65,000	18,000
" Stock in the Ports	246,000	243,000	251,000

The total visible supply of Cotton for all Europe on 26th instant affords the following comparisons with the two previous years :—

	1890.	1889.	1888.
Total supply of all kinds	1,393,000	1,015,270	901,800
" " Surats	462,000	290,910	295,830

For the United Kingdom only the figures are :—

Stock in Liverpool	572,000	435 270	360,550
" London	29,000	27,000	14,000
American afloat	130,000	81,000	53,000
East Indian "	15,000	17,000	21,000
Total ...	746,000	560,270	391,550
Price of Mid.-Americans	5 13-16d.	6 11-16d.	6d.
" Good Dholleras	4¼d.	4 13-16d.	4¾d.
Difference	1 7-16d.	1⅛d.	1¼d.

There has been more life in our local Cotton Market to-day, the Mills having come forward as buyers of old stuff, and over 3,000 bales are reported to have changed hands. Of these 1,000 bales were Julgaum, at Rs 165-9 ; 800 Barsee, at Rs. 183 ; 500 Bhagulcote, at Rs. 158 ; and 400 Karanja Ginned, at Rs. 166½; the balance being made up of smaller parcels of Compta, at Rs. 165 ; Veerumgaum, at Rs. 173 ; and Karanja, at Rs. 166½ per candy. The tone of the market has remained quiet for old Cotton at previous prices ; but for the new crop the feeling has been firm, with rates quoted Re. 1 to Rs. 2 per candy higher.

WHEAT has remained dull in tone, with not much fresh business reported, and with prices unaltered for all descriptions.

SEEDS have been taken to a moderate extent in a quiet market, and on the basis of previous rates.

The Receipts of Produce into Bombay yesterday were as follows :—

Cotton	336 bales.
Wheat	2,160 cwt.
Linseed	1,955 "
Gingelly	755 "
Poppyseed	772 "
Castorseed	4,603 "

FREIGHTS are quiet but steady in tone. We make quotations unchanged, but no fresh engagements have transpired to-day.

EXCHANGE has been weak again to-day with a downward tendency, a further decline of 3-32d. from last evening's closing rates having been established. A transaction in Telegraphic at 1s. 7⅝d. for December transfer, has been reported ; but business generally has been quiet. We quote ready :—

Bank Bills on Demand	1s. 7 15-32d.	per rupee.
Do. Telegraphic	1s. 7 13-32d.	"
Do. 3 months' sight	1s. 7 19-32d.	"
Credits 3 months' sight	1s. 7 13-16d.	"
Francs 3 months' sight	2·09	"

GOVERNMENT PAPER has been steady to-day at a slight improvement on yesterday's final quotations, Fours for cash having been quoted to the close at 103 3-16, and the same for the settlement, while for the October account, 102⅞ has been the rate. 5½ nominal, is still the quotation for the other denominations.

SHARES continue to attract very little attention on any line, and the only changes which we have to note this evening are a decline of Rs. 5 each in Alliance, City of Bombay, and Queen Cotton Mill shares ; and of Rs. 2½ in Manockji Petit, at our quotations ; and an advance of Rs. 5 in Mofussil Press shares at Rs. 445 per share.

DOMESTIC OCCURRENCES.

[THE CHARGE FOR NOTIFYING A DOMESTIC OCCURRENCE IS TWO RUPEES. THE ANNOUNCEMENT MUST BE AUTHENTICATED.]

OTHER PRESIDENCIES.

BIRTHS.

BROOKS—September 21, at Lahore, the wife of Sergeant Major S Brooks, 1st Punjab Volunteer Rifles, of a daughter.

HIGHAM—September 20, at Kassauli, the wife of T Higham, Superintending Engineer, Irrigation Branch, P W D, of a son.

COOPER—September 23, at Lahore, the wife of J Cooper North-Western Railway, of a daughter, still-born.

HENRY—September 21, at Bhogolpore, Western Dooars, the wife of Robert J. Henry, of a daughter, still-born.

DEATHS.

COOPER—September 23, at Lahore, Mary Georgina, the wife of J Cooper, North Western Railway.

HILL—September 23, at Allahabad, from congestion of the brain, Mr S A Hill, Professor of Physical Science, Muir C College, and Meteorological Reporter to Government, N-W P, aged 38 years and 11 months.

ROWBURY—September 20, at Murree, of heart disease, Elizabeth, the widow of the late James Rowbury, of Rawalpindi and Murree, aged 62 years, 6 months and 14 days.

The Bombay Gazette

MONDAY, SEPTEMBER 29, 1890.

THIS year's "Yellow Book," as the annual report of the trade and navigation of the Presidency of Bombay may be called, records a very interesting and important fact in the history of the trade of the port. For the first time the value of the export and import trade of Bombay, exclusive of Government transactions, exceeds a hundred crores. Roughly speaking, it has progressed since 1880-81 as follows :—1880-81, 69⅜ crores ; 1881-82, 76¾ crores; 1882-83, 79½ crores; 1883-84, 83½ crores; 1884-85, 84½ crores ; 1885-86, a little over 83 crores; 1886-87, 84½ crores; 1887-88, 91 crores; 1888-89, 97⅝ crores ; and last year, it reached Rs. 1,01,27,049. Thus in ten years the trade of the port has grown by nearly fifty per cent., and with the exception of one year the growth has been without interruption. The information will be peculiarly acceptable at a time when the shadow of commercial dulness rests over the trade of the city. It will encourage people to take a large view of the trading potentialities of the city, instead of dwelling upon the signs of what must after all be only a transient depression. In this total Rs. 42,21,00,000 represents foreign import trade, showing an increase of four crores and a third over the imports of 1888-89 ; and Rs. 40,97,000 represents the exports to non-Indian ports, exclusive of Government stores and Government treasure. The increase of imports—a little under a crore and a quarter—is largely due to private treasure. It is interesting to notice the part that treasure takes in adjusting the balance of trade between India and some of the creditor countries. Thus Austria, with a total export to India of the value of 56½ lakhs, remitted eleven lakhs in treasure ; France sent 31¾ lakhs out of a total of over ninety-nine lakhs ; nearly half the imports from Italy—valued at 41½ lakhs—were in treasure, while the proportions of treasure and goods in the imports from the United States—valued also at about forty lakhs—were the same. China, of course, pays very largely in silver in settling her bill with India, for Rs. 1,69,00,000 of the three crores and a quarter or thereabouts which the imports from China represented last year were in treasure, and it is characteristic of the absence of a regular trade between Australia and India that of seventy-three and a quarter lakhs of imports for that country last year—in return for exports in which wheat figured most largely—seventy lakhs and a quarter came in the form of treasure.

In the imports from the United Kingdom a decrease of ninety lakhs was shown in values. This is almost entirely accounted for by the cessation of railway construction in various directions. To this alone no less than 92 lakhs may be set down. Coal also fell off by fifty-five lakhs, this being attributed to overstocking in anticipation of a rise, and to the reduced demand from mills. But then there were increases in many other articles. Thus the imports of mill work and machinery—valued on the whole at Rs. 1,39,54,000—increased by twenty-seven lakhs and a quarter, while the metal imports—valued at only six lakhs short of two crores—increased by nearly eighty lakhs. The explanation of the latter fact is the revival of the demand for copper after the fall of the Syndicate in France and the reduction of prices that accompanied it. No favourable inference regarding the Bombay mill industry may be drawn from the increased imports of mill work. At the beginning of the year reported upon no fewer than fourteen mills were in process of erection in Bombay, but the trade was already becoming stagnant. As regards Continental trade with India, the exports show a much more marked tendency to increase than the imports. Despite all the energy in the outlying ports of the world, Germany is only credited with an export of twenty-five lakhs' worth of goods to India last year. It is certain, however, that much of the 41 lakhs' worth entered to the credit of Italy belongs really to Germany, and the same may, no doubt, be said of imports to the value of fifty-six lakhs from Austria. Imports from France grew largely last year, very nearly reaching a crore in value. But the exports to Germany have shown a remarkable increase, their value last year being 122 lakhs, against thirty lakhs and eleven lakhs respectively in the preceding two years. The increase has been chiefly in cotton, the exports of which to Germany last year exceeded those of the previous year by eighty lakhs. All round, indeed, the cotton exports were increased by the bumper crop of last year, with the exception of Russia, which took only twenty-four lakhs' worth as against forty-two lakhs' worth in the previous year. For this we have been prepared since it became known that the Transcaspian Railway was taking large consignments of Bokharan cotton for Moscow, and that it was being put upon the market at prices which must undersell the Indian staple. Turning towards China, the prospect is less satisfactory in every way. There is a decline of twenty and one-third lakhs in the total value of the exports thither. The increase of thirty-two lakhs in the recorded value of the exports of yarn and twist will not mislead any one who knows the conditions under which business with that country has been carried on for many months pasts. The decrease of thirty-five lakhs in the exports of opium to China from this port represents a serious loss to the Government of India. The return relating to Japan shows that notwithstanding the recent activity that has been shown in that country by indigenous spinning companies, Bombay is holding its own in the market. Last year the exports of twist and yarn thither were valued at ninety-seven lakhs, an increase of five lakhs on the previous year. But everyone knows that the trade was far from remunerative.

The facts given in the paragraph concerning Persia will strengthen the belief that an increasing trade can be done between this port and that country under the better conditions that have lately come into existence. The exports to Persia last year showed an increase of fifteen lakhs, following upon one of eleven lakhs in 1888-89, this being distributed over a large number of articles. In the imports the chief feature is an increase of ten lakhs worth *in the shipments of* Persian cotton, a by no means satisfactory incident in the light of what is told us in the report of this cotton, and of the use that is made of it. "Persian cotton," we are told, "is white in appearance, but the fibre is poor, and it does not fetch so high a price as cotton grown on this side of India. It is freely used for mixing with superior descriptions, and the admixture is then offered for sale as the produce of certain districts of India." This is well known to everyone who knows anything of the trade, but it is well that the necessity for putting a check upon fraudulent cotton dealing should be illustrated now and again, even by familiar instances. The tables give examples here and there of a putting back of the geographical limitations upon Indian trade. Thus Natal seems every year to be coming into closer commercial relations with Bombay. One article in which a growing trade is now being done is flour, the exports of which from this city to Natal alone last year increased in value by one and a half lakh. An interesting illustration of the vicissitudes through which a trade may pass is given in the table of imports of kerosine from the United States and from Batoum respectively. The imports from Batoum began in 1886-87 with a little under fifteen lakhs of gallons. The new trade at once had an effect upon the imports of the American article, which fell in the next year from fifty-eight and three-quarter lakhs of gallons to a little over twenty-three lakhs of gallons, though last year there was a recovery to about twenty-nine lakhs and a half of gallons. The Batoum oil meanwhile rose rapidly in the favour of the market, until last year's imports exceeded a crore of gallons. One fact in the return may be cited as a curiosity in agricultural history—the fact, namely that last year wheat to the value of two and a half lakhs was exported to Australia. There is no entry of a shipment of coals to Newcastle, and it would be interesting to learn what the conditions were that made it worth while to send wheat to a country which can grow all that it wants for itself, and a good deal over for the European market.

WE readily join in the protest that has been made elsewhere against the carefully elaborated inconvenience which the G. I. P. Railway have put forward in the shape of their new time table for October. The protest concerns itself especially with the bearing of the new arrangements upon the comfort and convenience of passengers going to or coming from the hill stations nearest to Bombay, and the proximity of which if the railway company will only helpus to enjoy them, gives Bombay a priceless advantage over every other city in India. It is not known that serious complaints had been made against the arrangements hitherto in vogue, and under which it was possible for business men to spend the week end at Matheran, Khandala, or Lanowli, and to return in comfort on Monday morning in time for their work. The one-thirty p.m. train (Bombay time) has hitherto been the favourite train for the journey to Narel, Khandala, and Lanowli, and it would still have met the convenience of the public despite the change in the time of departure of the mail. But the Company would not leave things alone, and for the sake of half an hour they have made the interval between the closing of the mail and the departure of this train so narrow that to many people—certainly to those who have to post with the extra stamp—it will be useless. If any change were to be made at all it should have been in the other direction, for if the train which now leaves at half-past one, local time, had been deferred until two it would have given opportunity for a mid-day meal before the time of departure of the train. It is impossible to see who will be the better for this change, but it is easy to see who will be the worse. Those whom the mail detains at office too long to permit them to catch this one o'clock train have as an alternative a train leaving at "seventeen o'clock"—to quote the Company's new method of timing—and as this means arriving at Narel too late to go up to Matheran the same night unless the moon is shining it means staying in Bombay altogether. The return trains seem to be arranged with an equally strange disregard for local traffic, and particularly for the special traffic on which Bombay people are so dependent for change of air in the hot seasons. Some of the trains are fixed for a virtually prohibitory hour. Thus at Lanowli you may sit up till one o'clock in the morning to catch a train that will bring you to Bombay at a quarter-past six, an hour too late for rest and too early for work. If you sit up at Lanowli till a quarter to three in the morning you will arrive at Bombay at seven. The visitors to Matheran will naturally be even worse off if they are dependent upon their trains, as many of them will be, for the alternative is a mixed train, from which they will have to change at Kalyan waiting in that most unattractive of halting places for twenty-five minutes, or till such time as the Up Jubbulpore train comes on. There is no item in the new table which adds to the public convenience, and there are several which seriously detract therefrom, and it is to be hoped that the local railway authorities, whom it is always pleasant, when possible, to commend for showing a desire to meet the convenience of the public, will revise the table in the light of the complaints that have been made concerning it. It is impossible at present to credit them with having done all that they might do to minister to the comfort of the travelling public at this end of the line. The reputation under which the G. I. P. refreshment rooms have long lain of being amongst the worst in India should not deter them from using the ample accommodation that is at their disposal at Victoria Terminus as it would be used in any other first-class city in the world. The convenience that it would be to passengers starting on a journey up-country if they could dine or lunch at the station before going into the train needs no demonstration. The most important trains leave at precisely the time of day at which such a provision would be most appreciated and four arrive in the morning at times when a bath and a breakfast would be a blessing that would atone for deprivation of comfort elsewhere upon the line. Whatever special views may be entertained at head-quarters concerning the ethical aspects of a properly equipped refreshment room these are merely individual opinions, which it is easy to respect, but upon which unrefreshed and thirsty travellers can scarcely be expected to keep silence. In regard alike to time tables and to the refreshment of travellers the convenience of the public should be the supreme law.

IT is well understood in India that th quiry about to be undertaken into the f of the mill operatives in regard to the pr alterations of the Indian Factories Ac formality which is necessary only in a p sense. Such ignorance on the subj needs to be dispelled exists not in this c where, since the enquiry of the Bombay mission in 1884, a sufficiency of inform has been available, but in England, whe Holt Hallett and the *Times*—which, t way, has wilfully closed its columns to ac and unbiassed statements of the of the case—have industriously dissemi fanciful and misleading accounts of th ditions of Indian factory life. Some men have been put upon the Comission ably Mr. Sorabjee Shapoorjee Bengali, w all along united to keen practical in genuine sympathy for the poor, and in the operatives have as true a friend as would have had in the late Lord Shaft himself. Some objection has been tak the appointment of Mr. N. M. Lokhand representative of the factory hands upo Commission. But Mr. Lokhanday, thou longer directly connected with mills, w some years an operative, and he has sinc in constant contact with the mill-hands. easy enough to call him a professional tor, but he stands almost alone as a cated man able to give expression, fro personal knowledge, to the facts of mi and to the wishes of the mill oper A workman straight from the loom doubtless have been a better choice we have not heard that there is an of the kind sufficiently educated t part in a public enquiry ; and so far as ascertain his nomination is looked upo no distrust by influential representatives mill interest. There is not much in th gramme drawn up for the Commission has not been already enquired into. But be an advantage to hear what practical has to say upon the question wheth technical expression, "young persons," s introduced into Indian legislation as it h into English. The transition from child to adult labour is certainly abrupt, but dealing with this question we must not greatly guided by *a priori* consideratio gested by the experience of English since the processes of physical develo like the transition from daylight into da are more rapid in the East than West. Here there is no twilight, or n none, and the change from childhood to m is almost as sudden. Whatever the is the inquiry may be, we trust that Gover will show a little more resolution, and more readiness to be guided by local than they did four years ago. Bombay, all, represents more than half the spinning industry of all India, and i fairly claim a larger voice than any individual province—certainly a larger than was conceded to it in 1885, wh Government of India in the most cavali pigeon-holed the recommendations Bombay Commission and the Resolut the Bombay Government on the subject.

WE have received from the honorary secre the Poona Gymkhana a copy of some corresp which has passed between him and Colonel Military Secretary to the Governor, in rela the reporting of the speech by his Excelle the recent cricket dinner at Poona. The mittee, in answer to Colonel Rhodes, say t speeches were reported without their knowle permission, and that the reporter has apologi

CCORDING to the report just prepared by order e French Minister of Marine, eleven war ships ne torpedo boat have suffered damage from ents of various kinds since the commencement e year. The damage done was in all cases of nimportant character, and in only two of them, boiler accidents, were any injuries received by members of the crews.

HE composition of the Factory Acts Commission be as follows:—Dr. Lethbridge (president), Piyari Mohan Mukharji, S. Shapurji and Mir omed Hussain, members. These gentlemen *be assisted in each province by selected repre-* tives of the mill hands, viz., N. M. Lokhanday, *bay*; Babu Ram Lal Ghose, Bengal; and Mr. ji Manakji, Cawnpore *Woollen Mills, for the* P. The Commission will submit its report *he middle of November.*

E process in Bari against some hundred mem- of the association of malefactors known as the la Vita," has ended in the condemnation of all two or three, to different terms of imprison- from ten years to two or three months. The ss of this "Mala Vita" to the ancient and artly existing Neapolitan "Camorra" is evi- Both have there able organization, their cere- s of initiation, their tremendous oaths, their t judgments of guilty members, and mortal nful punishment; both have their recognised ons into two sets, one of which is called that "Umilta" or "Humility," which, in Bari, is ghest rank, enjoyed by few, and they neither s nor forges, but purely assassins; both have ustom of tattooing the body with the strangest and most varied designs. The body of one of the most feared of the chiefs was covered with designs of serpents, horses' heads, proverbs, the names of friends and sweethearts. This custom is, no doubt, inherited from the old "Camorra" of Naples, and still exists in Naples among the thieves, women of bad repute, &c. At present the Bari "Mala Vita" is crushed, and the city enjoys a period of peace.

THE POONA RACES.

THE LAST DAY.

(FROM OUR OWN CORRESPONDENT.)

POONA, SEPT. 28.

THE big Poona Meeting of 1890 was brought to a conclusion yesterday afternoon, when we had a series of surprises, which the book-makers gladly welcomed. Backers generally had a poor time of it. The attendance at the Grand Stand and on the course was very large, their Excellencies Lord and Lady Harris and his Excellency Sir George Greaves being among those present. The Stewards have every reason to be gratified at the success with which the meeting passed off, and special credit is due to Dr. Gaye, the secretary, and his indefatigable assistant, Mr. Pallonjee Nusserwanjee, both of whom worked very hard all through. Dr. Gaye will leave Poona this week, and it is generally understood that Mr. Tom LeMesurier, who takes an undoubtedly keen interest in racing, though he owns no racers, will succeed him as honorary secretary of the W. I. Turf Club.

Of the six events coloured on the card for yesterday, the favourite won in only a single race, that being the third race on the card, the "Winner's Handicap," in which Minden romped in an easy winner, in spite of the crushing weight, which had been put on him. A great many people fancied Patna in this race, but this, I believe, was more because Gibbs was put on him, than because of their belief in the gelding's ability to win. The first big pot, which was upset, was the "Gondal Purse," for which Iolanthe was made a hot favourite, Why Not being considered good enough for place. Iolanthe had been backed for a large amount by her venture- some owner, who unfortunately had a run of killing luck all through the evening. Iolanthe was beaten in a canter by Telegram, a rank outsider, whom very few cared to speculate on, even with extremely favourable odds. This surprise was followed up by another in the "Selling Race," when Alert just managed to beat the favourite, Swallow, by a neck on the post. The chestnut had showed an improve- ment in each race in which he ran, and his victory yesterday, though it might be considered a fluke by a great many, is undoubtedly the result of careful training, upon which Mr. Bomanjee Eduljee is to be complimented. He would not sell him for Rs. 950. Success and Asteroid were for some reason most fan- cied in the "Kirkee Cup," but they did not make anything of a show, and even failed to secure a place. Gazee and Soheil found a large following for place investments, but almost everybody overlooked the game little Australian pony from Mysore, who was eventually the means of turning over a large pot. Vinall rode him in a very clever manner. When the distance post was reached he was fifth, but he came through with a rush, when within fifty yards of the post, and won by a length from Soheil, who had beaten Gazee by a couple of lengths. The number of false starts for this race was very irrita- ting. Some of the native jockeys would persist in hanging back and refusing to join their fields, while two of the European jockeys succeeded in breaking away ahead of the others at each attempt. It is satisfactory to note that the Stewards fined two of the jockeys who were reported by Mr. Beaty. Hudban gave us all a surprise in the "Consolation Handicap"; Gibbs on Tenebreuse finishing second again. Napier was made the favourite for this event; but he could not even secure a place. Mr. Farmer was equally unfortunate in the "Galloway Handicap," when Forat was beaten by both Merry- legs and Redeemer in the commonest style. A word of praise is due to Mr. Beaty, the official starter, who carried out his duties as such in a manner, which called forth the encomiums of the Stewards. Colonel Le Marchant, as judge, had a difficult task to perform. Nobody could have done as well as he did.

The following are the details of the racing:—

1ST RACE.—"The Gondal Purse."—Rs. 500 presented by H. H. Sir Bhugwatsingji, K.C.S.I., Thakore Saheb of Gondal. A handicap for all horses qualified to run in the Joonaghur Cup, ¾ mile. Entrances sweepstakes, and division of entrance and stakes for the 2nd and 3rd horses as in Joonaghur Cup. Handicap to be published the day before the race. The winner gets approximately Rs. 620, the second horse Rs. 120, and the third horse Rs. 30.

The Thakore Saheb of Bhownugger's b c b m Telegram, 6st, Native	1
Mr Farmer's b c b m Iolanthe, 10st 7lb, Capt. Ross	2
Mr Ali Abdoola's b c b c Why Not II, 6st 10lb, Noor Mahomed	3
The Chief of Mudhole's b c b m Gunga, 8st 12lb, Ramchurn	0
Aga Moochool Shah's g c b h Uncas, 8st 8lb, Killick	0

After one breakaway, Uncas and Why Not in company forced the pace, with Iolanthe lying last. From the home turn Iolanthe, the favourite, began to improve her position, while Telegram came through with a rush, and took the lead. At the distance the Favourite made great efforts to chal- lenge Telegram, but she failed to catch him, and the light weight reached home about two lengths in front of the Favourite. Why Not made a poor third. Time.—1 min. 24 3-5secs. The totalisator paid Rs. 29 on each Rs. 2 ticket.

Betting: 1 to 2 on Iolanthe; 3 to 1 against Why Not; 5 to 1 against Gunga; 6 to 1 against Uncas; and 10 to 1 against Telegram.

Place Betting: 1 to 5 on Iolanthe; evens on Uncas and Why Not; and 3 to 2 against Gunga and Telegram.

2ND RACE.—Selling Race.—Rs 400 from the fund, for all Arabs. Horses entered to be sold for Rs. 1,000 to carry 10st; 7lbs added or deducted for every Rs. 100 above or below selling price. Maidens allowed 7 lb. Galloways allowed 7 lb. Entrance 3 G M. To close and name the day before the race. Distance six furlongs. Winner gets Rs. 760, the second horse Rs. 45.

Mr Bomanjee Eduljee ch a h Alert, 7st 7lb, A Wahed	1
Mr Scone's b a h Swallow, 7st 11lb, Gibbs	2
Mr Framjee Dorabjee's b a h Ringleader, 8st 4lb, Robinson	3
Mr Cursetjee's b a h Young Euclid, 8st 2½lb, Kendall	0
Mr Hussan bin Budder's g a h Tulpha, 7st, Luchman	0
Mr Scampton's g a h Nil Desperandum, 7st 2lb, Native	0
Mr Farmer's b a h Buccaneer, 7st, Noor Mahomed	0
Mr Kempton's bn a h Lansdowne, 6st, Kama	0
Mr S A W's b a gal Kailan, 6st, Native	0

From the start Swallow, the hottest favourite, took the lead, and cut out the work from the rest, with Buccaneer last. Swallow held the premier position till within the distance where Alert, Young Euclid, and Ringleader came up. A splen- did race now ensued between the four down the straight; Alert, to the surprise of not a few, lasted out best, and won by a neck from the favourite, Ringleader pulling up three lengths off. Time.—1 min. 22¾ secs. The totalisator paid Rs. 34 on each Rs. 2 ticket. When put up to auction Alert was bought in by his sporting owner for *Rs. 940.*

Betting: 3 to 1 against Swallow; 4 to 1 against Ringleader and Young Euclid; 10 to 1 against Lansdowne; 12 to 1 against Kailan, Alert, and Buccaneer; 16 to 1 against Tulpha; and 20 to 1 against Nil Desperandum.

Place Betting: 1 to 3 on Swallow; 1 to 2 on Young Euclid and Ringleader; evens on Alert and Kailan; 2 to 1 against Tulpha, Nil Desperandum, and Lansdowne; and 3 to 1 against Buccaneer.

3RD RACE.—"The Winners' Handicap."—Rs. 1,000 *from the Fund, forced for all* Arab and Country-bred winners during the meeting. Entrance *Rs 50* for each race won, with a starting Sweepstakes of 1 G M to go *to the third horse. Optional to all* Arab and C-B losers and horses that have run in closed races at an entrance of Rs 25; half forfeit. Top weight to be at the dis- cretion of the Stewards. Distance 1¼ miles. To close and name the day before the race. The Winner gets approximately Rs 1,293-12, second horse Rs. 393-12, and third horse Rs. 75.

Col Wahab and Mr Woolmer's ch c b gold Minden, 10st 5lb, Mr. Woolmer	1
Mr Hussan bin Budder's b a gal Patna, 7st 10lb, Gibbs	2
Mr Newton's g a h Sultan, 7st 7lb, Noor Mahomed	3
Mr Farmer's g a h Soocab, 8st 8lb, W Greenhalgh	0
Mr S A W's g a c Boatman, 7st 10lb, Robinson	0

Sultan, followed by Patna and Soocab, made the running immediately the flag dropped, Minden and Boatman in company last. The five ran in Indian file to the three-quarter mile, where they closed in. After another furlong, Patna with Minden alongside were at Sultan's heels. At the top of the hill Patna had secured a slight advantage and turned the corner first, but in the straight Minden came away, beat Patna easily, and won by two lengths and a half. Sultan was three lengths and more behind Patna. Time—2min. 50⅕secs round the course. The totalisator paid only Rs. 6.

Betting: Evens on Minden; 2 to 1 against Patna; 6 to 1 against Sultan; 8 to 1 against Soocab and Boatman.

Place Betting: 1 to 3 on Minden; 1 to 2 on Patna; evens on Sultan and Soocab; aad 3 to 2 against Boatman.

4TH RACE—"The Kirkee Cup."—Rs. 800 from the fund. A handicap for all ponies. The handicap to be published the day before the race. Distance 6 fur- longs. Entrance 1st May two G M, 1st July six G M, 1st September 10 G M, when the race will close with a sweepstakes of 3 G M for each pony declared to start. The second pony to receive half the entrances, and the third pony to receive Rs 100 out of the start- ing sweepstakes. Half forfeit of entrance if declared before the 10th September. The winner gets Rs 1,735, the second horse Rs. 540, and the third horse Rs. 100.

Mr Devaraj Ur's b aus p Paraekaretu, 9st, Vinall	1
H H Aga Khan's g a p Soheil, 8st 2lb, Wool	2
Mr Cursetjee's b a p Ghazee, 9st 2lb, Kendall	3
Aga Jungee Shah's b a p Success, 9st 4lb, W Greenhalgh	0
Mr Kempton's g a p Steward, 8st 6lb, Killick	0
Mr Grant's b a p Orion, 8st 5lb, Oomer Jr.	0
Messrs Patterson and Mackay's g a p Asteroid, 8st 4lb, Robinson	0
Major Radcliffe's b a p Cucumber, 8st 11b, Gibbs	0
Mr Lloyd's g a p Cyclone, 8st 11b, D Greenhalgh	0
Mr Woolmer's g a p Mirror, 7st 8lb, Jessa	0
Mr S A W's b a p Clipper, 7st 8lb, Ahmed	0

After several breaksaway, for which Mr. Beaty, the starter, reported Kendall and D. Greenhalgh, who were each fined two gold mohurs by the Stewards, the large field were got away to a good start, though Orion's native jockey persisted in hanging back in an irritating manner. Asteroid and Cyclone forced the pace to the three-furlong post, where Soheil came to the front. Gazee, Ste- ward, Soheil, and Asteroid turned into the straight almost together, and a pretty race ensued. Within fifty yards of the winning-post, the Australian pony Paraekaretu came through, from fifth place, and won a good race by a length from Soheil, between whom and Gazee there was a length and a half. Time—1 min. 27 4-5seconds. The totalisator paid Rs. 30.

Betting: 3 to 1 against Asteroid; 4 to 1 against Success; 5 to 1 against Steward; 6 to 1 against Gazee; 10 to 1 against Paraekaretu and Orion; 12 to 1 against Soheil and Cucumber; and 20 to 1 against the others.

Place Betting: 1 to 3 on Gazee; 1 to 2 on Asteroid and Success; evens on Paraekaretu, Ste- ward, and Soheil; 2 to 1 against Orion and Cucum- ber; and 3 to 1 against Mirror, Cyclone, and Clipper.

5TH RACE.—"The Consolation Handicap.—Rs 500 from the fund. For all Arabs and Country-breds which have started during the meeting and not won, Entrance 4 G M; ¼ forfeit. Distance 1¼ miles. To close and name the day before the race. The winner gets approximately Rs 905, the second horse Rs. 405.

Mr Ali bin Ameer's b a h Hudban, 8st 12lb, Ibrahim	1
H H Aga Khan's b a h Tenebrense, 7st 9lb, Gibbs	2
Mr Sulliman Dawood's ch a h Grand Duke, 7st 12lb, Native	3
Mr Farmer's ch a h Napier, 9st 7lb, W Greenhalgh	0
Mr Newton's ch a h Silvermane, 8st 4lb, Kendall	0
Aga Z and C Shah's g a h Diamond, 8st 3lb, Wool	0
Mr Carr's b a h Danube, 7st, Native	0
Mr Newton's bn a h Coral, 7st, Luchman	0
Mr Framjee Dorabjee's ch a h Raby, 7st, Native	0
Mr S A W's bn a h Young Sirhan, 6st 10lb, Ahmed	0
Mr Framjee Dorabjee's ch a h Acrobat, 6st 7lb, Native	0

Young Sirhan forced the running, with Tene- breuse and Silvermane in close attendance. Coral, as usual, hung back a great deal. Tenebreuse and Sivermane joined the leader at the top of the hill, and they turned into the straight together with Hudban close on their heels. After a great race up the straight Hudban came up inside the rails with a rush, and just won on the post by a head. There was only a neck between second and third. Time—2min. 23⅘secs. The totalisator paid Rs. 23.

Betting: 2 to 1 against Napier; 3 to 1 against Tenebreuse; 5 to 1 against Silvermane; 8 to 1 against Danube and Young Sirhan; 10 to 1 against Hudban, Diamond, and Coral; and 20 to 1 against the rest.

Place Betting: 1 to 2 on Napier and Tene breuse; 4 to 6 on Sivermane; evens on Hudban, Danube, and Coral; 2 to 1 against Grand Duke and Diamond; and 8 to 1 against the others.

6TH RACE.—"The Galloway Handicap."—Rs. 500 from the fund. For all Galloways that have started during the meeting. Entrance 4 G M; half forfeit. Distance 1 mile. To close and name the day before the race. The winner gets approximately Rs 960; the second horse gets Rs. 60.

Mr Khaliffa bin Esau's ch a gal Merrylegs, 8st 9lb, Robinson	1
Mr Peter's b a g Redeemer, 7st 7lb, Noor Mahomed	2
Mr Farmer's ch a g Forat 9st 2lb., W. Green- halgh	3
Mr Hussan bin Budder's ch a g Ameer, 8st 8lb, Gibbs	0
Mr Grant's b a g Starlight, 8st 4lb, Kendall	0
Mr S A W's b a g Pioneer, 7st 11lb, Ahmed	0
Mr Framjee Dorabjee's b a g Saturday, 6st 12lb, Native	0
H H Aga Khan's g a gal Pekin, 6st 4lb, Pillajee	0

Pekin and Pioneer led from the start to the head of the straight with Ameer and Starlight close up behind them. Merry Legs turned into the straight first, with Forat at his girths. Half-way up the distance Pekin and Redeemer challenged Merry Legs, who had kept ahead of Forat, but could make nothing of it. Merry Legs won easily by a length and a half with Redeemer second; Forat a poor third. Time—1 min. 54 2-5secs. The totalisa- tor paid Rs. 24.

Betting: 3 to 2 against Forat; 4 to 1 against Ameer; 5 to 1 against Starlight; 10 to 1 against Redeemer, Merry Legs, Pekin, and Saturday; and 12 to 1 against Pioneer.

Place Betting: 1 to 3 on Forat; 1 to 2 on Ameer and Starlight; evens on Merry Legs and Pekin; and 2 to 1 against the rest.

ARRIVAL OF H. M.'S TROOP-SHIP SERAPIS.

HER MAJESTY'S Troop-ship Serapis, Commander C. P. G. Hicks, arrived in harbour yesterday evening, from Portsmouth, which port she left on the 3rd September, calling at Malta on the 11th, Port Said on the 16th, and Suez on the 17th instant. She brought 49 officers, 13 ladies, 11 officers' children, 1,040 Euro- pean rank and file, 68 women, and 74 children. During the voyage the wife of a band-master died. The vessel experienced fine weather throughout the voyage. The following are the names of the officers and their families:—

KEMP & Co.'s EQUATORIAL HAIR DOUCHE imparts unspeakable comfort and a sense of refinement to the Toilet, refreshes the Brain, and counteracts the depressing influences of hot weather. Per bottle. Re. 1-8 and Rs. 2-8.

PRIMARY EDUCATION IN BOMBAY.

THE following reply by the Educational Depart- ment has been sent to the President of the Muni- cipal Corporation to the Corporation's letter of July last:—

Bombay Castle, 20th September 1890.

From W. Lee-Warner, Esq., Secretary to Government; to the President of the Municipal Corporation of the City of Bombay.

Sir,—I am directed to acknowledge the receipt of your letter No. 3,612, dated 21st July, 1890, being a reply to this Government letter No. 1,988, dated the 12th October, 1889, relative to the provision of pri- mary education for the City of Bombay.

2. Your letter reviews the progress of the decen- tralisation policy in India, and enunciates the prin- ciples which appear to the Corporation to have guided the expansion of self-government, anterior to the enactment of the Bombay Municipal Act III of 1888. The effect of that Act is then discussed, and you affirm that the law imposes upon the Corporation, in respect of primary education, a legal burden and obligation, and also confers a discretionary power. Arguing on the fact that the provision for primary education is inadequate, you observe that the Corporation has pro- vided Rs. 43,380 for the purpose, which is largely in excess of the grants which the Corporation previously used to make for the purpose, and you state that the Cor- poration cannot but view with concern the suggestion made by Government, that all additional expenditure necessitated by the growth of primary education should be borne solely by the Corporation. The responsibility of Government in this respect is, in the opinion of the Corporation, paramount, and if Government measure the wants of education in Bombay by their present con- tribution, you observe that the Corporation will feel compelled to be guided (as is contemplated by the Act) by the value and appreciation placed by Government on the advancement of primary education. In conclu- sion, you observe that the charges which Government had fairly to bear in 1888-89, would have been larger than Rs. 25,000, if the Educational Department had not arrested the usual increments in anticipation of a transfer, and that Government have overlooked econo- mies in the cost of inspection and supervision.

3. I am to observe in reply that it is impossible for Government, in the administration of public affairs, to be influenced by abstract views that are as- serted to have been held prior to the action of the Legislature. The law must be presumed to be the concrete form given to such views by an authority, to which both Government and other parties must sub- mit. Government have neither the right nor the power to construe their duties, save as the law directs. The effect of recent legislation is described by the Honourable the Advocate General in these terms:—"I am of opinion that the general obligation laid on the Corporation by section 61 (q) of the Bombay Munici- pal Act III of 1888, is not modified or cut down by the provisions of section 120 (c). The latter provi- sion prescribes what shall be the minimum pecuniary provision under section 61 (q), leaving unaffected and in full force the Corporation's obligation under that section to make such provision on an "adequate" scale. It is of course possible that the minimum under section 120 (c) might in some official years not be an 'adequate' provision, and in such cases it would, in my opinion, be 'incumbent on the Corporation' under section 61 to make a contribu- tion from their general revenue sufficiently in excess of the minimum to reach the point of 'adequacy.'"

4. In this condition of public policy as defined by the Legislature, Government, taking advantage of the permission given to them by the law, and not acting under the compulsion of the law, decided to give to the Municipality of Bombay a contribution of Rs. 25,000: and in fixing that amount they had to, and in effect did, pay a due regard to the wants of the whole educational area of the Presidency, and to a fair assignment of the public revenues available for educa- tional purposes amongst the various communities, urban and rural, from whose contribution those reve- nues are provided. The fact that Government fixed their contribution on the basis of the expenditure of 1888-89 shows that they wished to put the Corporation in a similar position to that which preceded the pass- ing of the Act and the transfer of primary education to the body thereafter entrusted with the duty of making adequate provision for it. I am to remark that the Corporation appears to have been misinform- ed as to the starving of the primary schools in anticipation of legislation. The need for legis- lation with a view to enlarging the obligations of the Presidency municipalities in respect to education was enforced by the Education Commission, and it was after the issue of that report that the Gov- ernment grant was raised in Bombay from Rs. 11,563 in 1885-86 to Rs. 16,000 in 1886-87. The additional grant of Rs. 9,000 for grants-in-aid was calculated on the growth attained by primary aided schools to which up to the date of transfer aid, when applied for, was never refused: and apart from these combined contributions Government are still continuing to con- tribute as before to certain composite institutions in the city which educate pupils in the pri- mary as well as in the secondary stages. In so far as Government continues directly this special assistance, it relieves the Corporation of a part of the obligation to make adequate provision for primary education that is imposed upon it by law. This consideration further serves to show that Gov- ernment have treated the Corporation in an equitable spirit. In comparison with the assistance which Gov- ernment are able to render to primary schools managed by the rural Boards, the contribution of Rs. 32 per thousand of the population of the City of Bombay shows an advantage in favour of the Corporation. With reference to your remarks on the subject of in- spectors, I am to state that no saving has been effected. I am also to observe that in view of the approaching transfer, the Bombay School Fund was allowed to ac- cumulate a balance which rose from Rs. 5,700 in 1881 to Rs. 16,600 in 1889.

5. In conclusion, I am to assure the Corporation that the Governor of Bombay in Council recognises, as unreservedly as they have been recognised by pre- vious Governments of Bombay, the claims which primary education has upon the State, and he will be glad to continue assistance to the Corporation up to the limits of the public funds at his disposal. The rural community has for many years past contributed a special cess for educational and other needs. Muni- cipalities have more recently undertaken the same duties as the local boards; and the funds, which the general tax-payer has placed at the disposal of the Provincial Government, will be applied to supplement local effort where it is most needed, and to the largest degree of which provincial resources are capable.—I have, &c.

THE JUDGES, THE JURORS, AND THE JURY-BOX.

TO THE EDITOR OF THE "BOMBAY GAZETTE."

SIR,—The letter of your correspondent "Juror" in to-day's issue reminds me of a severe cold I caught a couple of years ago, when I had the honor of serving as a juror. On that occasion the punkahs were at full swing, although we were in the middle of January, and what with the cold wind playing on our heads (some of us were unfortunately bald), and the draught on our backs, we found it impossible to devote much attention to the case in hand, and at last, we had to ask permis- sion to have the door at the back of the jury-box closed. I suffered for three days after from severe cold and fever, and was obliged to call in the doctor, and thus for having had the honor of serving her Majesty. I had to pay through the nose for doctor and medicine.

I think it very desirable that the internal arrange- ments of the Criminal Court should be altered in such a way that the convenience of the jurors (who are not paid) should first be considered.—Yours, &c.,

CITIZEN.

Bombay, 27th Sept., 1890.

II.

TO THE EDITOR OF THE "BOMBAY GAZETTE."

SIR,—The grievance mentioned by your correspon- dent "A Juror" is a real one as I can testify. I have never been unlucky enough to serve on a jury two days following in the Bombay High Court, or I should certainly have had a serious illness as a consequence of it. But I have several times served a day at a time, and on these occasions there has been a stiff breeze blowing from the sea through the open window, and catching my right side in a very painful way, I have sat it out all day with the ever present thought—interfering with my attention to the case being tried that I should suffer for my chilled liver next day. And having been over 20 years in India, and not being over-robust, I always have suffered the next day and for several succeeding days the way that those whose livers are sensitive must suffer from such exposure.—Yours, &c.,

September 27. DUTY.

NAWAB MOHSIN-UL-MULK is about erect a new and handsome two-storied residence on the plot of ground he recently purchased from the Viccajee family for fifteen thousand rupees, next to the house he is at present occupying in Chudderghaut. The building is designed by Mr. Chisholm, of Baroda, and will cost about half a lakh of rupees when completed.

THE DISTURBANCES AT GOA.

A MESSAGE FROM THE KING OF PORTUGAL.

DR. DA GAMA has received the following tele- grams from his Majesty the King of Portugal:—

Magestades mandam dizer interessam muito. Parti- cipe Goa diga se socegon.

Translation.

The King and Queen send to say that they take great interest in the matter. Communicate this to Goa. Reply if peace has been restored.

Appended are other telegrams which have been ent to us:—

GOA, SEPT. 27, 2-30 P.M.

Continuam perseguicoens administrativa judicial.

Translation.

Executive and judicial persecutions continue.

GOA, SEPT. 27, 6-25 P.M.

Agradeco. Adhesao nome povo Bardez. Persegui- cao continua Salsete.

Translation.

Thanks. Adherence in the name of people of Bardez. Persecution continues in Salsette.

GOA, SEPT. 27, 4-40 P.M.

Processos perseguicoens continuam justificar mortes innocentes. Vidas populares perigo.

Translation.

Prosecutions and persecutions continue for justify- ing innocent deaths. The lives of populars in danger.

MARGAO, SEPT. 27.

Persecutions continue. Administrative orders for im- prisonment. The leading members pray for urgent provisions. The people are dismayed. Please help.

MARGAO, SEPT. 28, 4-45 P.M.

Terror continues. Last night the Governor sent more force to prevent the people from being present at the publication of the result of the election. Yesterday four persons were imprisoned by the executive in combina- tion with judicial authorities. Witnesses bought to impute deaths to popular leaders. The reading of the *Anglo-Lusitano* and the English papers has caused a consoling impression.

The following is forwarded to us by the editor of the *Anglo-Lusitano*:—

Copy of a telegram, dated 26th instant, addressed by Mr. Aderji Hormusji Dadarwalla, president of a meet- ing of the inhabitants of Nagar-Avely, a district of Damaun, to the Portuguese Colonial Minister:—

"Pedem providencias crimes mortandade irmaos Salsete."

Translation.

We ask measures against crimes and deaths of our brethren of Salsette.

From a supplement to the *Correio da India*, dated 23rd September, the following summary is extracted, giving some new statements regarding the disturbances of Sunday week:—

His Excellency the Governor-General is said to have telegraphed to Lisbon as follows:—Sedition, dynamite, popular version lie, lie, lie old tactics of Brandao elec- tion, which proved unsuccessful.

Reply from Lisbon, "Establish order and prestige of authority" The same paper, further says:—After the tumult during which the Municipal hall was injured, quiet was restored, and influential persons of the popular party retired to Mr. Soares' house, when 50 soldiers commanded by Lieut- Assa, and led by the Administrator Luis Carneiro, who had followed the populars, and, thrashing them with a whip, opened fire, which brought low 50 persons of both sexes, 13 of whom died. Ten soldiers directed their aim towards the house of Mr. J. M. Alvares, where the popular leaders had flocked. A shot struck the hand of Mr. Victor Pereira piercing it through. In the balcony was Mr. Ponciano d'Albuquerque, who received a bullet, and died instantly. Likewise two women died, one at the door of a Medical Dispensary and the other in the Church, in consequence of which the Patriarch Arch- bishop ordered the church to be closed. A boy who was looking from behind a court-yard received a bul- let on his head. The persons died are three from Benaulim, four from Navelim, two from Colva, and two from Betalbatim, in all 13. There is a suspension of liberty of the people. Any one belonging to the Indian party is arrested. A force has been despatched to ap- prehend Loyola, Roque, Correio, Machado, and others. It is reported that there have been scuffles in other assemblies where members of the Ultramarine party has been ill-treated, but no deaths have occurred. The death of Mr. Ponciano d' Albuquerque is not due to ex- plosion of dynamite, of which none was used. Mr. Bruto da Costa, the editor of the *Ultramar* and his son are said to have received rough treatment, but they are safe at home, five soldiers have been slightly wounded, and a Corporal seriously injured. In the assembly of Chinchinim, two governmental and two popular persons were wounded. At Raia two, and at Assolna one wounded; all of the Government party. At Margaum four houses of the popular leaders are besieged. At Consolim seven soldiers arrived from Margaum to secure the man who snatched papers from the hands of Elestiao Barretto, and Mr. Joao Manuel Pacheco was stoned. The six soldiers who are wounded recieved in- juries only from stones. The people had neither staffs nor walking-sticks with them. After the scuffle had commenced they took their sticks to defend themselves from those who pursued them. The wounded and the dead were conveyed to a house, and Dr. Nunes from Marmagao was telegraphed for to attend the wounded, but he sent his assistant to take them to Marmagao hos- pital. It is said that some were taken to the Hospicio.

To-day a party of eight soldiers was sent to arrest Agapito Gonsalves, A. M. Mergulliao, and Antonio Gabriel da Silva, because they forcibly took away the minutes of the proceedings from the President who did not want to give the papers to them.

The popular attitude is firm. Some misguided persons pinioned the Barrister L. G Ferrao, the Ultra- marine President Bruto da Costa and his son received a hammering. The Vicar of Margaum and his assis- tant from an open window absolved the dying persons as they could not rush out without danger to their lives. The Patriarch Archbishop is going to Margao. Our contemporary asks:—Did the Governor-General realise his position as the chief authority of the State? Why did he not proceed to the scene of disaster and prevent bloodshed? Instead of sending 60 more soldiers with three cases of cartridges to fire on the crowd up to this time the Government Council has not been convened to consider the necessary measures.

At Marmagoa the Government Agents were dis

ed by the dredgers amounted to nearly two millions of tons. To get through this work four dredgers of different kinds are kept constantly employed. The largest is the "Teredo" dredger, which keeps three Hopper barges, the "Curlew," the "Mudlark," and the "Snipe" going. It can lift as much as 8,000 tons of mud in one day. Each of those barges can hold 400 tons, and is filled by the "Teredo" in forty minutes. On being filled the barges leave for the deposit ground at Oorun. On going round a particular buoy there, chains are slipped, the bottom of the barge falls out, dropping the mud, and without stopping, the barge returns to the dredger for another load. Looking at the barges one would imagine the dredger is stationary; but it is not. Three chains are fixed to bow and stern of the vessel, and by means of a steam winch it is moved backwards and forwards across the cut, 200 feet in width, over which it may be operating. There is the "Kuphas" dredger, which holds 1,000 tons, and carries its own mud to the deposit ground. It is a first-rate dredger, and was the best of its kind ever built at the time it was launched. Then, there are the "Pholas" and "Priestman" dredgers in use in the docks. The former is the one mentioned in a previous article, which can be used as a fire-engine, and the latter works with two Hopper barges alongside capable of holding 100 tons each.

GYMKHANA CRICKET.

MR. A. P. GOULD'S ELEVEN vs. MR. J. H. TWISS'S ELEVEN.

THE Gymkhana ground on Saturday last, in default of a match, was utilized for a game under the above title, and was remarkable for a stand—phenomenal, indeed, in Gymkhana cricket—of no less than 98 runs for the ninth wicket on Mr. Twiss's side. There was little bowling of much quality on either side, and the wicket was in grand run-getting order, the result being that 352 runs were put together between 1-45 and 6 p.m., or at a rate of scoring of nearly 80 runs an hour! This, for the Gymkhana ground, is wonderful, indeed. Mr. Read and Mr. Vines, Indian Marine, were the heroes of the "stand" referred to above, and though their batting was not perhaps of the highest order, and was considerably aided by missed catches, both batsmen hit remarkably freely. Mr Lowis, who took 7 wickets and was particularly on the spot, shone forth afterwards in a very fine innings of 57, the best batting of the day. There was a very close finish at the end, the first side in just winning by 2 runs.

We believe there is a match arranged for next Saturday between the Gymkhana and the Marine Lines C. C., and this, as the polo week comes immediately after, will close the Gymkhana cricket for the year. But if, as is believed possible, but the month is not yet known, the next English cricket team from home will arrive in Bombay in December, cricket will be kept going in order to prepare for them. It is, at all events, known that the next English team commence their tour at Bombay, and not in Ceylon, as last year, when they played their first match on November 28. The following is the score and analysis:—

MR. J. H. TWISS'S ELEVEN.

THE BHOWNUGGER CITY PRESS AND MANUFACTURING COMPANY.

THE following directors' report of the above company has been issued:—Your directors beg to lay before you the annual report of the company for the year ending 30th June, 1890, showing a net profit of Rs. 15,487-1-6, including the sum of Rs. 99-7-7 brought forward from last year. Your directors have much pleasure to state that the total number of bales pressed by the company during the year amounted to 23,283 against 14,738 pressed last year. Out of the amount standing to the credit of profit and loss account your directors recommend a dividend, at the rate of Rs. 25 per share, or at the rate of 10 per cent. per annum, on the paid-up capital of the company, free of income-tax. This will absorb a sum of Rs. 13,750, leaving a balance of Rs. 1,737-1-6 to be carried to next year's account. The company's property has been insured for Rs. 40,000. Mr. Narandass Purshotamdas, one of the directors, retires by rotation, but he is eligible for re-election. You are requested to appoint an auditor or auditors for the current year to fix his or their remuneration.

THE E. I. R. AND THE FIFTY YEARS' RULE.

THE East Indian Railway Company have adopted the 55 years' rule in the case of all their officers, writes the *Pioneer* leaving, however, power in the hands of their Agent to recommend that particular individuals should be granted an extension of service. Under existing conditions the ordinary contract between the Company and its officers has been that the engagement may be terminated by six months' notice on either side; while, where no special contract has been entered into, a month's notice only is required. It is not intended that the introduction of the 55 years' rule shall give anyone the right to claim to be employed up to that limit; the liability to discharge will still remain. The new rule is to be enforced with effect from January 1st 1892, the cases of those officers now above the age of 55, or who will attain that age before the above dates, being separately considered. The Board express the wish to avoid the infliction of hardships on individuals, and state that all proper weight will be given to substantial claims for special consideration, but there is only too much reason to believe that their action will press rather harshly upon more than one of the old officers of the Company who have spent their lives on the line. The disestablishment of the Provident Fund, which was once such a splendid insurance for all the servants of the undertaking, came as a severe blow to those who had hoped to reap the benefits of it in their old age; and the ruling of the Government of India that gratuities will only be granted for specially distinguished service has intensified the gloominess of the outlook.

SOME of the tribes on the part of the Afghan Frontier affected by our survey operations are, the Lahore paper hears, much exercised in mind, owing to news having been received to the effect that the survey party, which is shortly expected to arrive, will be accompanied this time by two companies of native regiments from Sialkot and Rawalpindi. The information had been conveyed by some sepoys who went to their homes on the frontier on leave, and are said to have warned their neighbours not to interfere with the survey party. On the previous occasion some of the frontier budmashes did all they could to check the progress of the survey and also fired on the coolies.

MEETINGS OF PUBLIC COMPANIES.

MOFUSSIL COMPANY, LIMITED.

THE twentieth annual general meeting of shareholders of the company was held on Saturday evening, at the registered office, Rampart Row, Mr. Nowrojee Jehangir Gamadia, chairman of the board of directors, presiding. The following report of the directors was submitted:—

Your directors have the pleasure to place before you their annual report and the balance-sheet for the year ending 30th June, 1890. The cotton crop of the past season was again a very large one, and your machinery was well employed, the number of bales pressed during the year was 2,15,718, and the number under joint working was 2,27,273. Owing to competition between the presses at Hinganghat the pressing rate there was reduced to Rs. 2 per bale, and in consequence your directors were compelled to reduce the rate at our Wurdha factory. The same was the case at Delhi. At Agra, owing to a sixth press factory having started work, the joint working there broke up on the 4th November, 1889, and a fresh agreement was not made until 17th December, and during the interval pressing rates fell to Rs. 1-8 per bale, including hoops and gunnies. At Kosi the pressing rate was also reduced in order to check cotton being conveyed to Hattras, where a third press factory had been erected, and the pressing rate was lower than that of Kosi. At Broach no ginning association was formed this year and the ginning rate was in consequence low. The joint working agreements which expired during the year at Delhi, Etawah, Kekri, and Oomrawuttee, were renewed for a period of one year each. The agreements at Oomrawuttee, Karunja, Agra, Delhi, Etawah, and Kekri expire shortly, and the Wurdha agreement expired on the 30th June, 1890. Your new Khangaum gin factory did not start work until the 21st January, 1890, owing to the engine not having been delivered in time for the season, and very little work was done. Looking to the increase in the imports of kuppas at Karunja, and in order to maintain the company's position at that station, your directors have resolved to increase the number of gins there to sixty. A new engine is on the way out and the work of erection in general is well advanced. The press machinery purchased at Dohrajee was not removed, but was worked under an arrangement made with the Gondal Durbar. This arrangement has been renewed for another year. Owing to some small defects in the machinery, the press did not work satisfactorily and the cotton purchased did not come forward until very late in the season. Your directors have since the close of the year purchased a ginning factory of 80 gins at Sayan for Rs. 8,500. As it is situated at one of the best stations on the railway line, in the Olpad districts, your directors believe that it will assist materially in keeping the Rander press at work. Your directors regret to report that several accidents occured at the following factories, and the delivery of cotton in Bombay is thereby much retarded:—At Bhilwara, a distribution valve-box burst, by which the press there was stopped for three weeks. At Kekri, a fire occured on the 21st March, and a considerable quantity of cotton and the roofs of some of the mixing sheds were burnt. The cost of repairing the sheds, Rs. 677-3-0, has been debited to fire insurance fund account At Karunja a fire occurred in the press-house on the 23rd April. As there was a very strong wind blowing at the time the building was entirely gutted, and some damage was done to the machinery. Some cotton was also burnt. The bulk of the stock of the cotton left on hand was sent to your Sheagaum factory to be pressed. The cotton, both at Kekri and Karunja, was fully covered by insurance. The cost of rebuilding the press-house and other repairs at Karunja, estimated at about Rs.10,000, will be debited, when finished, to fire insurance fund account. Owing to these mishaps and delays a considerable quantity of cotton was left on hand at the close of the season, when exporters were unable to operate in consequence of the enormous and unprecedentedly rapid rise in exchange, following upon the introduction and passing of the Silver Bill in America. The rupee prices of cotton consequently fell rapidly, and the company has thereby sustained a loss in its cotton business as shown in the accounts. The new oil mill at Sheagaum was ready for work on the 22nd May, but as it is not working satisfactorily, steps are being taken to remove any defects that may exist. The profit and loss account for the year shows a credit balance of Rs. 1,76,753-12-8, from which your directors have set aside Rs. 50,000 to depreciation fund, and they recommend the payment of a dividend of rupees forty per share, which will absorb Rs. 1,25,000. The balance will be carried forward to next year's profit and loss account. Your directors have much pleasure in informing you that the long-pending suit against the company in respect of the "Laga" at Broach has been decided by H. M.'s Privy Council in the Company's favour. Your directors regret to report that a sum of Rs. 550 was paid in October last under three forged dividend warrant, for 11 shares. The matter was placed in the hands of the police and all endeavours made to trace the perpetrators of the frauds, but without success. The system of payment of dividends, which has been in force since the existence of the company, has therefore been altered, and the dividend warrants will in future be filled up in the company's office. Mr. Cooverji Rustumji Nanawuttee, who resigned his post of agent at Randir on the 31st December last, owing to ill-health, after serving the Company for 20 years, has requested that a bonus be granted to him. His appliction will be laid before the meeting, and the directors trust that his long and faithful services will meet with your favourable recognition. Your directors consider that the Articles of Association should be amended to provide for the inspection of the company's factories by the directors, and for fixing their remuneration while they are away from Bombay visiting and inspecting the factories. An extraordinary general meeting of the shareholders has therefore been called, and will be held immediatly after the termination of the annual general meeting, to pass the necessary special resolution. The Hon. Mr. A. F. Beaufort, on proceeding to England, retired from the board, and Mr. N. S. Glazebrook was appointed in his stead. Under clause 99 of the Articles of Association Messrs. N. J. Gamadia and N. S. Glazebrook retire by rotation, but are eligible for re-election.

The chairman, in addressing the meeting, said:—The report presented to you, gentlemen, deals so fully with the events of the past year that it leaves me very little to say. I would therefore take up very little of your time, touching on a few topics of importance only. The first matter I would like to mention is the regret of the directors at the item of Rs. 47,304-11-6 shown to the debit of cotton account. Those of you who have followed the course of the cotton trade this year, will, I feel sure, be not surprised or alarmed by that loss. The price of cotton has since the beginning of the rains gone down fully Rs 25 to 30 per candy, consequent on the heavy rise in exchange, and no one can expect a business of the dimensions of this company to escape without a loss in such a time. In fact, I think we should be thankful that our has not been bigger. The unsold cotton left on our hands shown in the accounts as 2,383 bales, has been taken over at a very low valuation, and your directors, among whom is Mr. Glazebrook, a gentleman of very great experience in the trade, have gone thoroughly into the figures, and are quite assured that if nothing unexpected happens, it will fully realise the amount it is taken over at. In fact I have now the pleasure to inform you that several more bales have been sold since the accounts have been closed, and that without any loss. The next item I would say something about is the heavy amount paid for discount and interest. You are all aware what a tremendously tight money market we passed through during the first four months of the year, the very time when our requirements are the greatest. It is, I think, a matter for congratulation that your company's credit is so high in the bazar; that it was never even in such difficult times put to any inconvenience for want of funds to finance its business. Your profits this year have also been affected by low rates both for ginning and pressing, and you will not under the circumstances, consider the working at all disappointing, a dividend of 10 per cent. after setting aside Rs. 50,000, to depreciation account is not a bad result of the year's operations. I am glad to inform you that the crop reports so far from all the districts in which your factories are situated, are so far satisfactory, and we hope we may be able to meet you next year with better results.

The directors' report and audited accounts were approved and adopted; and the payment of a dividend of Rs. 40 per share was sanctioned, payable free of income-tax to the shareholders, whose names stood on the register that day. Messrs. Nowrojee Jehangir Gamadia and N.S. Glazebrook, who retired by rotation, were re-elected directors; Messrs. Sadanand Balkrishna and Furdonjee Ardasir Cursetjee were appointed auditors for the year commencing 1st July, 1890, with a remuneration of Rs. 250 each. A bonus of Rs. 500 was directed to be paid to Mr. Cooverjee R. Nanavatti in consideration of his long and faithful services to the company.

At the conclusion of the business of the annual general meeting an extraordinary general meeting of the shareholders was held, at which the following special resolution was passed:—That article 114 of the Articles of Association be amended by the addition of the following words after the words "Fixed by the board":— "The board may also from time to time depute any one or two of its members to proceed on tour for the purpose of visiting and inspecting the factories of the company, or any one or more of them, or for any other purpose which the board may deem advisable in the interests of the company, and the remuneration of each director so proceeding on tour, until fixed in the manner provided in article 94 hereof, shall be Rs. 30 per day for every day he shall be absent from Bombay in addition to his travelling expenses.

The customory compliment to the chairman terminated the proceedings.

THE LAKHMIDAS KHIMJI SPINNING AND WEAVING COMPANY, LIMITED.

The seventh ordinary general meeting of the shareholders of the above company was held on Saturday afternoon, at the registered office of the company, No. 27, Apollo Street, Fort, Dr. Shantaram Vithal, the chairman of the company, presided.

The following report of the directors for the year ending 30th June, 1890, was submitted to the meeting:—

Your directors beg to submit the accounts for the year ended 30th June, 1890. The statement of profit and loss shows that the company's earnings during the past year amount to Rs. 94,914-14-11, which including a balance of Rs. 215-5-2 brought forward from previous year's account, makes a total of Rs. 95,130-4-1. From this amount Rs. 20,800 have been carried to depreciation account, leaving a balance of Rs. 74,330-4-1, which your Directors recommend should be applied as under:—To ad-interim dividend already paid for the half-year ended December 31st, 1889, at the rate of Rs. 35 per share, Rs. 35,000; to dividend for the half-year ended the 30th June 1890, at the rate of Rs. 35 per share, Rs. 35,000; to be carried forward to next year's accounts, Rs. 4,330-4-1; making a total of Rs. 74,330-4-1. The item of Rs. 11,172-8, being the amount of shares sales premium, which is separately shown under the heading of VI. Reserve Fund in the last accounts, has been now included in the item of Rs. 54,172-8 appearing as Reserve Fund Account in the present accounts. The past year was an unsatisfactory one for mill industry, as cotton was dear and the prices for yarn were low during the greater part of it. But at present, although yarn has not advanced in price, cotton has already declined considerably, owing to advance in exchange and good cotton crop accounts from America. This decline is likely to continue, and the present prospects are better. At present the Company's working shows a fairly good result. Your Directors have the pleasure to state, and it will be very pleasing to the shareholders to know, that the loan of Rs. 3,00,000 from Mr. Parmanandas Jivandas on the mortgage on the Company's land, building and machinery, having fallen due on the 13th July last, has been paid off, and there is now no lien of any kind on the Company's property in respect of the same. Your Directors, in their last year's report, intimated to you that they had ordered out some 6,000 additional spindles and preparatory machinery. These have since arrived and have now been working for some months past. You have now 32,268 mule and 7,080 ring spindles, making a total of 39,348 spindles in full working order; and should the present margin continue, the balance sheet for the current year will be a satisfactory one. The mill building, machinery, stores and the stock of cotton and yarn at the mill are insured for Rs. 13,41,000.

Resolutions were then passed adopting the above report; declaring a dividend of Rs. 35 per share to be made payable on and after the 1st October 1890; electing Dr. Shantaram Vithal and Mr. Khimj Bodani directors of the company; re-appointing Messrs. Krishnanath Kirtikar and Balkishan Gangadas auditors of the accounts of the Company for the current year, their remuneration to be Rs. 150 each; and the shareholders best thinks to the Directors and secretaries, treasurers and agents of the Company, for their efficient, economical and satisfactory management of the Company's affairs during the past year.

The usual vote of thanks was tendered to the chairman, and the meeting terminated.

THE ANTHROPOLOGICAL SOCIETY OF BOMBAY.

THE usual general meeting of the above Society was held at the Society's rooms, 6, Apollo Street, on Wednesday, the 24th instant, Mr. Cursetjee Rustomjee Cama vice-president, presiding.

The following paper was read:—

THE PRIMITIVE AND AUTONOMOUS COINAGE OF INDIA (WITH ILLUSTRATIONS), BY DR. J. GERSON DA CUNHA.

The early coins of the Indian princes and of the peoples, cities, and countries are amongst the most interesting monuments of Ancient India. They are mostly found in Northern India or in the countries lying between the Himalaya mountains and the Nurbudda river; but examples are not wanting of a similar currency in Southern India.

As an introduction to the subject, it may be worth while to give here a brief historical sketch of the discovery and elucidation of their series. The first to interpret the types and fix their attribution was the eminent founder of Indian numismatics, James Prinsep, in several papers in the Journal of the Bengal Asiatic Society, afterwards collected and published in two volumes under the title of "Essays on Indian Antiquities" by Edward Thomas. It is true that before him two other writers—Colonel Tod, in the "Trans actions" of the Royal Asiatic Society, vol. I., and Professor H. H. Wilson, in the "Asiatic Researches," vol. I., the latter following up the subject subsequently more at length in his "Ariana Antiqua"—had referred to the series; but it was reserved for Prinsep, who was the first in this as in many other fields of Oriental research and scholarship, to discover and to identify them.

But Prinsep's identification was not an instance of inspiration, but the result of deep, assiduous, and long-continued studies. At first he doubted "whether any native coin, properly so called, had circulation in India anterior to the incursion of Alexander." (Essays, Vol. I., p. 53.) At a somewhat later stage he speaks of the series as "entirely new to Hindoo numismotology." (Ibid, page 82.) And at last he says:—"I am not, however, about to contend that the Hindoos had no indigenous currency of the precious metals. On the contrary, I think evidence will be found in the collection about to bedescribed that they circulated small pieces of a given weight; that stamps were given to those varying under different circumstances; and that many of these earliest tokens exhibit several stamps consequently impressed on the same piece, until at last the superposed impressions (not those of a die, but rather of a punch) came to resemble the devices seen on the Indo-Scythian coins, in company with which they have been found buried in various places, particularly in Captain Cautley's Herculaneum, at Kohat, near Saharanpur." (Ibid. p. 196.)

I have quoted here the whole passage, as it is much more satisfactory to have the whole than a partial gleaning or summary of Prinsep's views on the subject, his *ipsissima verba*. It is now generally admitted that the Hindoos had currency of their own prior to the advent of the Greeks; that here, as elsewhere, the necessity felt, in the primitive stage of civilisation, of abandoning the ancient usage and inconvenience of barter, led to the adoption of a metallic currency; and that to obviate a constant recourse to the scales, uniform pieces with an authoritative mark suggested itself. Thus pieces cut to the required standard weight, received the impress of a symbol guaranteeing their acceptance and general circulation. There were then coins in gold, silver, copper, and lead, besides the mixed metals, bilon and brass, but silver was the only metal first used for this purpose.

The coins were regarded as prehistoric by the older Indian writers, and, according to Sir Walter Elliott, they may be presumed to have been found in circulation when the Aryans entered Hindostan, and appear to have been known to earlier Sanskrit writers under the designation of *purana*, a term which itself means ancient. They have been discovered, according to the same authority, among the ashes of the men who constructed the primitive tombs known as *pandu kulis* (or Kistvaens) and the chambered tumuli of the South, and have been unearthed from the ruins of burried cities throughtout India—from Nepal to Ceylon, and from Kandahar to the delta of the Ganges—their marks or symbols varying according to the different localities in which they are found.

After Prinsep, the subject was taken up by a few scholars on the Continent, such as Burnouf and Lassen, and in England by Sir Walter Elliott, Thomas, General Cuningham, and my friend Dr. Codrington, all of whom had spent some of their time in this country; while in India itself only two native scholars have contributed towards its elucidation—the late Dr. Bhau Daji of Bombay and Dr. Rajandralala Mitra of Calcutta. I am indebted to all these writers for their valuable researches, while my own share in it is a very modest one. I have no new theory to build upon so slender a base as this collection of coins before you, although it is in itself, I believe, as complete a series of specimens of the kind as one is able to gather, representing the gleanings of several collectors, which I was fortunate enough to purchase. Nor do I propose any new attribution. I content myself to add only a few new examples or inedited types, and then offer some additional remarks and inferences to be drawn from these new facts or data carefully collected and systematically arranged.

To show how important the subject is, I may quote here the opinions of two of the most eminent Indian numismatologists. "These coins," says Thomas, "are probably the most important—in their strictly local bearing—of the entire range of the numismatology of India that her soil has preserved to reveal unwittingly to modern intelligence, the story of the ancient possessors. (Essays, vol. I., p. 203.) And Cunningham writes:—"Amongst the interesting monuments of ancient India are the few autonomous coins of peoples, cities, and countries which have hitherto crowned our researches. It is true that they may be counted on the fingers, but few as they are, they are of most interest and greater value than the numerous coins of kings and princes whose very names are unknown to history." "Arch. Surv. of India," vol. XIV., p. 135.

With regard to the nomenclature of this primitive Indian coinage, the names vary considerably. The good coins are in one place called *suvarnas*, in another *nishkas*, and elsewhere *gadyanakas*; while the silver ones are called *puranas*, *satakas*, etc. This latter class Sir W. Elliott proposed to call oldings, adapted from the Anglo-Saxon *eld*, old, representing exactly the Sanskrit *puranas*.—"*Num Orient.*," p. 45.)

The metrology of the series would require a paper by itself. I will confine myself here to a very short summary. Of gold, there were, as far as they are hitherto known, the *suvarna* and quarter *suvarna* weighing 16 *mashas* or 140 grains and 35 grains respectively. Of silver there were the *karshapana*, *kona* and *tangha*, the first weighing 4 mashas, or 32 ratis or 56 grains, the two latter being 28 and 14 grains each. Of the copper coins, there were the *pana*, *ardhapana*, *kakini*, and *ardhakakini*, weighing 140, 70, 35 and 17½ grains. The unit of this monetary system was the *pana*, the rest being the subdivisions or multiples of this unit. This *pana* of 140 grains is equal to 80 rati seeds, each seed weighing about 1·75 grains. A handful of these seeds consists generally of 80 seeds, and the word *pana* is said to be derived from the Sanskrit *pani*, the "hand."

The proportion among the metals, or the rate of exchange of this ancient Indian monetary system, seems to have been 1 of gold to 10 of silver, and 1 of silver to 40 of copper. There were also lead coins and some alloyed pieces, as I have said before, but their issue and circulation were limited to certain districts.

After nomenclature, metrology, and rate of exchange, comes the subject of symbolism of this curious series, which would also require a paper by itself.

To describe the origin and development of the several symbols, types, or designs, relating to different religious sects, political divisions of the country, and dynastic changes undergone from time immemorial, engraven on these coins—often one above the other, the superposition indicating the length of time they have been in circulation and the vicissitudes they have witnessed,—would indeed be very interesting, but I would rather reserve them for a separate paper.

Before entering on the description of the coins, let me reiterate the statement, which is indeed the cornerstone of this essay, that the high antiquity ascribed to these coins is based on the character and style of the types and on the execution of the coindies themselves, for which one can unhesitatingly claim a fabrication independent of Greek art, and therefore their original issue before the occupation of Northern India by the Bactrian Greeks, more than two centuries before our era, although many coins of the latter may have been current along with the former or been imitated; in fact, they formed the prototype of the coinage of the Indo-Grecian king, Pantaleon, and again of Agath-okles. Besides the arguments pointing to the fact of these coins being both in shape and in standard quite foreign to any of the Greek systems, thus establishing the truth of the Hindoos having been in actual possession of a real coinage in the time of Alexander's expedition, we have the statements of some classical authors, among others of Quintus Curtius, who relates how on Alexander reaching Taxila, its rajah or king, whom he calls Omphis, presented to the great Macedonian talents of coined silver. He uses the words *signati argenti*, and *assignatus* being the term used by the Romans for coined money, it is evident that he refers to coined silver.

To enter now on the description of the coins, let me divide them, for the better arrangement or simplification of so complicated a series, into four classes, viz.:—

1. The punch-marked coins.
2. The cast coins.
3. The die-struck coins.
4. The inscribed coins.

1. The punch-marked coins were so named by James Prinsep, because each device had been struck by a single punch or stamp, the several stamps being struck at different times, the later frequently obliterating or effacing the older ones. Besides, the edges of this class of coins are often turned slightly upwards, the result of being stamped with several small punches at more or less long intervals, whereas the die-struck coins, being struck but once, are invariably flat. Prinsep describes these coins in one place as "stamped with various *chhaps*, as might have been the custom anterior to the general introduction of coined money. (Ibid., p. 74.) Now the word *chhaps* is said to be derived from the Hindostani word, whereas the word is originally Portuguese, and imported into the vernaculars of India. I have already referred to the numerous Portuguese words which, through intercourse with Portugal by means of her early navigators and missionaries, have been introduced into the vernaculars of India, and also into the Chinese and Japanese. (See my memoir, entitled "Oriental Studies among the Portuguese" in the "*Atti del IV. Congresso Internationale degli Orientalisti* of Florence, 1878," my "Konkani Language and Literature," and also my contribution to the "Bombay Gazetteer." There the punches are said to be either dynastic or commercial, each new dynasty authenticating the currency of the princes superseded or the mint authorities attesting to the standard weight and purity of metal. I have here some Portuguese rupees about three hundred years old, stamped with sirroff marks to test the quality of the metal, resembling or nearly identical with the punch marks. This practice seems to have been generally followed in India from time immemorial, and can be traced to the ancient money-changers or shroffs authenticating the current coins. They are a survival of an ancient and unconquerable custom.

2. The cast coins are easily recognised by the depth of the projecting keel on the margin, showing where the moulds were united and the greater corrosions due to the softness of the metal.

3. The die-struck coins were struck by a small die, on which there were engraved at the first stage of the currency many, and then, at a later persod of development, a single type.

4. The inscribed coins were struck with characters of either the one or the other, and sometimes of both of the two forms of Pali, the Aryan, and the Indian of the time of Asoka, about 250 B.C. Here are the specimens to exemplify each of these classes of coins.

I now close my remarks on this subject, hoping to give a descriptive catalogue of the unedited designs at some future time.

After a vote of thanks to the contributor of the above paper, the meeting was dissolved.

GENERAL STUDHOLME HODGSON, who commanded the forces in Ceylon many years ago, and saw much service in India and Burma, died on the 31st ultimo, aged 85. His grand-father, Field-Marshal Studholme Hodgson, born in 1708, is known in history chiefly as Commander-in-Chief at the siege of Belleisle in 1761—the first military triumph in the reign of King George III.

WYSCHNEGRADSKY is the name of the present Russian Minister of Finance. He is now on a tour to Baku, Ouzoun Ada, Askabad, Merv, Charjui, and Bokhara. He was due at Samarcand on the 22nd inst., and at Tashkend one day later. He proposes to visit Khodjent, Khokand, Namangan, Andijan Osh, and Novoye Marghilan. On his return journey he will remain three days at Merv.

THERE are among the English colonies of Boulogne-sur-Mer, Calais, and Pau many British subjects who set at defiance judgments pronounced against them in England. A case in point is said to be that of the editor of the *Matrimonial News*, who was mulcted in damages in a breach of promise case to the extent of £10,000. After having placed out of the reach of the law all that he possessed, he placed the Channel between himself and his too practical sweetheart, who is now seeking to obtain *exequatur*. It is impossible for a French court to confirm what it regards as a judicial eccentricity.

IN defending the Nicaragua Canal scheme, Mr. Daniel Amman states that while tens of thousands have fallen victims in the attempted construction of the Panama Canal, the climate of Nicaragua has been proved to be eminently favourable for such operations. Moreover, the destructive floods on the Isthmus of Panama present, according to this authority, an insuperable difficulty. Nine years have elapsed since M. de Lesseps' great undertaking was commenced; yet even as a lock canal not one quarter of the work has as yet been completed. Mr. Amman explains this by the fact that what has been done in great part year by year has been undone during the heavy rains, and he predicts that if the board of engineers who are about to proceed to Panama to determine on a plan for the continuation of the works, should decide for a sea level canal, it will be found that at times they have altogether too much water. On the other hand, if they adopt the last idea of M. de Lesseps of having the summit of the canal thirty feet above an admitted constant water supply, they will, he is of opinion, have a great deal of pumping and very little water to pass ships from sea to sea.

NEWS IN ADVANCE OF THE MAIL.

LONDON, SEPT. 6.

A CHANNEL STEAMER IN COLLISION.

On the arrival of the Lynx, one of the Great Western Railway Company's steamers, at Weymoth yesterday afternoon, from the Channel Islands, information was obtained of a collision which had occurred a few hours previously off Portland, and from which the Lynx narrowly escaped serious damage. It appears that about 1-30, when some twenty miles from Portland, she was run into by the German steamer Oovelcome of Hamburg for New York, laden with oil. The Lynx was struck on the port bow, but, fortunately, when it was seen that the collision was inevitable, the two steamers altered their courses, and instead of the German steamer striking the Lynx amidships, she gave her a slanting blow just above the galley, bulging her ironworks, and starting her plates. The collision was very violent, nearly all the Lynx's passengers being knocked from one side to the other. It was at first feared that the Lynx was seriously damaged. About twenty of her passengers jumped on board the German steamer, which soon got away, and then stood by to render assistance. Fortunately, this was not needed, as the Lynx's hull was intact; and, after the passengers had been on board the German steamer for a short time, they were transferred to their own ship.

THE BRITISH ASSOCIATION.

The sectional meetings of the British Association were resumed at Leeds yesterday. The papers of most general interest were those read in the Geographical Section, nearly all of which related to Africa. Dr. Kerr Cross dealt with Nyassaland; Dr. Freeman with Ashanti; Mr. Maund with Zambesi; Mr. Wilkinson with the Kalahari; Mr. Keltie with the commercial geography of Africa; and Mr. Silva White, with the political portion of Africa. The Economic Section was also interesting.

SHAKESPEARE IN GERMANY.

Berlin, Sept. 5.—During the performance of Shakespeare's *Tempest* at the Court Opera House last night the electric light failed before the third act was reached, but the lighting apparatus provided for such an eventuality was used, and the comedy was played to the end.

THE MANŒUVRES AT FLENABORG.

Flensborg, Sept. 5.—The Emperor shows the greatest attention to Admiral Hornby, who is here as his Majesty's guest, at to-day's manœuvres. The operations were much impeded by the earthen banks which are used to divide the fields and which prevent cavalry and artillery from operating in great force in Schleswig-Holstein.

The new rifle shows certain imperfections owing to the excessive heating of the barrel inside the mantle. The Emperor himself accompanied the final advance of the 17th Infantry Division against the enemy, represented by a skeleton Army.

His Majesty seems very anxious to carefully test the qualities of the 9th Army Crops, which, as he said at the parade banquet last night, is handicapped by being composed of men drawn from a very wide area (Schleswig-Holstein and Mecklenburg), and seldom has an opportunity of manœuvring on a large scale.

THE FLOODS IN GERMANY AND AUSTRIA.

Dresden, Sept. 5.—The Saxon Court has been obliged to remove from Pillnitz to Strehlen, as the Elbe has invaded some parts of the castle.

Vienna, Sept. 5.—The Danube is beginning to flood the railway, and the goods station is only accessible from one side. Two warehouses in the city are flooded.

Prague, Sept. 5.—The floods are beginning to abate. The Emperor has sent 10,000fl. for the immediate needs of the victims.

THE FIRE AT SALONICA.

Salonica, Sept. 5.—Particulars of the recent fire are just coming to hand. More than 12,000 persons are without shelter. The work of extinction has been abandoned on account of the scarcity of water, and the firemen are only trying to save their own goods. The English and Greek Consulates, the Greek-Hospital, and the mosque of St. Sophia have been destroyed. The distress is indescribable.

SWINDLING A PRINCE.

Pesth, Sept. 5.—A Prince of the Bavarian House of Wittlsbach, whose name is kept secret by the police, has procured the arrest of some Hungarian sharpers who had inveigled him to Pesth, where they made him sign notes to the extent of 100,000fl., in return for which he received 6,000fl.

AMERICAN NEWS.

MR. EDISON AND THE EMPEROR WILLIAM.

New York, Sept. 5.—Mr. Edison, having been interviewed with respect to the despatch from Berlin, charging him with discourtesy towards the Emperor, admitted that he had promised to send a phonograph to his Majesty but had entirely forgotton it. He has ordered one to be prepared especially, and it will be forwarded without delay. He denies that he had ever cabled that the phonograph was under way.

Sept. 5.—The liabilities of Sawyer, Wallace and Co., will, it is estimated, reach from £300,000 to 400,000. The assets are unknown, but will be small. The chief cause of the failure was the attempt of Mr. Lucius Willard Sawyer, manager of the London Branch of the firm, to corner the pork-market. The failure is absolute, and totally beyond hope of recovery. The business of the firm was enormous. They exported three-forths of all the wheat sent to Germany, and the failure affects the entire provision market. Sawyer Wallace and Co., also had a large branch at Louisville (Ky.) which exclusively handled tobacco.

The firm has issued the following statement:—New York, Sept. 4.—It is with inexpressible sorrow that we are forced to close a business career for 37 years by a general assignment for the benefit of our creditors. Our resources have been completely exhausted by losses in foreign option business (wheat and provisions chiefly) conducted through London. Owing to the number and variety of these foreign accounts we cannot state the amount of our liabilities or assets, but when we can a meeting of our creditors will be called, if they so desire. Meantime we have turned over to the assignee, Mr. Marshall Ayres, of New York, all our assets both individual and partnership, without preference to c reditors.

THE TARIFF BILL.

Washington, Sept. 5.—A dozen pages of the tariff dealing with articles of the free list passed the Senate to-day. There was a severe struggle over the proposal of the Democrats to place cotton and bagging on the free list, together with binding twine and cotton bagging. This proposition was defeated by 28 votes to 26. Senator Plumb proposed to remove uncured hides from the free list, and charge a duty upon them of one per cent. per lb. This motion was also defeated.

Washington, Sept. 5.—The Senate is continuing the discussion of the Tariff Bill, and has adopted Article 6, exempting tin ore and tin from duty modifying it, however, by the insertion of the words "until January, 1892, and not afterwards."

AN EXPRESS TRAIN WRECKED.

Albany (N. Y.), Sept. 5.—The Adirondack, Montreal, and Niagara Falls express train on the Hudson River Railway was wrecked last night three miles north of Castleton. Four passengers are reported to have been killed. It is also reported that the train was maliciously wrecked, but only the most meagre details have yet been received.

New York, Sept. 5.—Another correspondent says:—The Montreal express train which left New York at 7-30 last night was wrecked near Albany, and four men and one woman were reported killed, but later accounts say no serious injuries were caused. It is stated that the accident was caused by rails or ties having been fastened on to the track, but no details have yet been obtained. The train consisted chiefly of sleeping carriages.

Five thousand dollars reward is offered for the detection of the miscreants who wrecked the Montreal Express. Ties or rails were placed across the track, and wedged timber so arranged as to prize the engine off the metals. The train consisted of eight cars and carried sixty-three passengers. Six of the cars were precipitated down the embankment. Of seven passengers who were injured, three only met with serious injuries.

OVERBOARD FROM AN ATLANTIC STEAMER.

New York, Sept. 5.—The captain of the Cunard steamship Gallia, which arrived yesterday, reports that Dr. James Harrison, of Preston, England, disappeared during the voyage. Dr. Harrison was a middle-aged gentleman, rather stout,

...CE.

...ts made their ex... insectivorous plants, the importance of micro-organisms was not realised, and hence their results are questionable. In 1875, M. Edouard Morren investigated the behaviour of the *Pinguicula Drosera*, and arrived at a conclusion quite different from the opinions of Darwin on these interesting plants. Another series of experiments on the *Nepenthes* has been undertaken by M. Raphael Dubois, whose results have just been communicated to the Academie des Sciences, Paris. Sir Dalton Hooker considered that the carnivorous attributes of the *Nepenthes* was beyond a doubt, but M. Dubois has found reason to differ with him. His observations were made on a great variety of these plants at the botanical garden of the Tete d'Or, Lyons, for example, the *N. Rafflesiana, Hookeriana, coccinea, phyllamphora, distillatoria, hybrida,* and *maculata*.

The urns of all these plants enclose, before the opening of the operculum or cover, a limpid liquid, slightly acid. When the operculum opens, the liquid seems to putrefy, and the vestiges of insects are found in it. M. Dubois found that if the liquid was drawn from the still closed urn by means of a sterilised pipette, it continued limpid for several months, and when first drawn had no effect on coagulated albumen, even if heated to a temperature of 35 deg. or 40 deg. C. When filtered at the end of several hours it contained no peptones. Nor were any micro-organisms found in the pure liquid of the closed urns, or any trace of putrefaction. Only a *torula*, similar to the yeast of beer, was noticed at times, but its presence and purpose there has not yet been fully examined.

On the other hand, when the liquid was drawn from urns which had been open some little time, and was still clear, it rapidly attacked the albumen (little tubes of white of egg) which became transparent and gelatinous, and lost its angles. In some cases the liquid became putrefied. It was found to swarm with divers micro-organisms, and after filtration gave some of the reactions of the peptones. Many of the open urns contained insects, but in process of putrefaction, not of digestion. Fresh fibrine was not used in these experiments because it dissolves in certain liquids without there being a true digestion, and because it would have been cooked during the sterilisation. Nor was cartilage used, because it would have been partially transformed into gelatine.

M. Dubois concludes from his researches that the liquid of the *Nepenthes* does not contain a digestive ingredient like pepsine, and that they are not carnivorous plants. The phenomenon of false digestion observed by Hooker was, without doubt, caused by micro-organisms which had entered the urn from without, and were not secreted by the plant.

Vegetation appears to be retreating on the high Alps. Mr. David Martin, a geological surveyor, has observed that the rhododendron is not found above a height of 2,000 metres, whereas 20 years ago it flourished at 2,350 metres. Birch, pines, &c., disappear at an altitude of 1,800 metres, except in certain parts exposed to the moist winds of the north, where they reach 2,300 metres. Lower down, the vine, which formally grew at Valgaudemar, an altitude of 1,050 metres, is only seen to-day at a height of 850 metres. Poplars are nearly all dead upon the crest of the hills.

The retrogression of vegetation has also been observed in Siberia, and among other places, in Savory, and at the Grande Chartreuse. Mr. Martin thinks that owing to the disappearance of glaciers the trees suffer from drought in summer, and extreme cold in winter, against which they are not sufficiently protected by the snow.

At the recent meeting of the Academie des Science, M. Delecluze drew attention to the incomplete success which has hitherto attended the treatment of vines for black-rot by applying a solution of sulphate of copper to the leaves. He attributes the partial failure to the practice of only moistening the upper surface of the leaves, whereas it is important to moisten the under surface too, and the results of his experiments in this direction would seem to put the matter beyond a doubt.

An interesting astronomical discovery has been made by Professor Pickering, of Harvard University, U. S. The constellation known as the Great Dipper, consisting of seven stars, has four in the bowl or pan, and three in the handle. Mizar, the middle star of the handle, is of the second magnitude, and even to the naked eye is observed to be double. Alcor, its partner, is of the fifth magnitude, and the Arabs considered it a good test of the eyesight to discern the pair. Professor Pickering has, however, found by the telescope that Mizar itself, that is to say, the larger one, is double at regular periods of 52 days, and the inference is that Mizar consits of two immense suns revolving round each other, sometimes appearing as one and sometimes as two stars. The period of revolution of each sun about the common centre of gravity is estimated at 104 days, and their maximum velocity is 200 miles a second.

An indicator of the accumulation of explosive gases in the room, mine, or ship's hold has been brought out by Herr Eduard Stern, of Cologne. It consists of a porous vase or cylinder closed by a thin metal membrane, like the chamber of an aneroid barometer. The explosive gases penetrate the pores of the vessel by a well-known property of diffusion, and raise the membrane, thus closing the circuit of an electric bell, which gives the alarm when there is a sufficiency of gas to cause a danger of explosion.

The new explosive "carbonite" is giving satisfaction to coal miners. At a recent meeting of the South Wales Institute of Engineers, Mr. W. Stewart stated that within his experience a ton of the material had been used without a sign of flame or sparkling. It is a stable compound, and can be stored without deterioration for any length of time. It is rendered comparatively safe by the fact that a detonator is required to explode it. If struck with a hammer or stone no danger need be apprehended.

Carbonite is lighter than dynamite, is of a brownish colour, and contains 25 per cent. of nitroglycerine. Certain sulphuretted hydrocarbons are added to moderate the susceptibility of the nitroglycerine.

The Thomson Electric Welding Company has built a machine for the express purpose of utilising scrap steel rod by welding it and drawing it into fence wire. It is usual at present to melt the scrap over again before it can be turned to account.

Some years ago the late Sir William Siemens obtained some interesting results by growing vegetables and fruit under the continued influence of the electric light. In the botanical department at Cornell University some further experiments have been made in the same direction. The rays of powerful electric lamps were allowed to fall on the plants day and night, and the seedlings fairly shot up. In a few weeks they were several times taller than others growing in the natural way. So far as foliage went there seemed a decided advantage in the luminous forcing, but in the matter of fruit, the plants which had grown as usual were more prolific than those which had been forced.

The "stereorama" is a new attraction at the Eiffel Tower. It consists of a pavilion lighted inside by a single arc lamp depending from the domed roof. Round the cylindrical wall, a few feet above the ground, is a circle of fifty lenses, or peep-holes, at which the spectators take their seats. On looking through the holes fifty distinct views of the late Paris Exhibition can be seen, and each picture is brought successively under the eye of a spectator by the slow and automatic revolution of the pavilion.

The water power of the Missouri River is to be utilised for the supply of the city of Helena, Montana. A gigantic timber dam is being constructed across the river near that place so as to form a reservoir covering an area of 429 square miles. Thence the water will be led by a tunnel to a series of turbines driving dynamos, which will generate electricity for the use of mills and factories, as well as the lighting of the city.

Mitafife, a new variety of the cotton plant, discovered a few years ago at Benha, is being more and more cultivated in Egypt. The cotton it yields is not so fine in quality as that of the Ashmouni plant, but the crop is more abundant, earlier, and less subject to atmospheric influences. In the provinces of Sharkieh, Galioubieh, and Menoufieh, and throughout most parts of Lower Egypt, it is replacing the Ashmouni, Bamia, and Sallini varieties.

The engineering fraternity of America, civil, mechanical, and mining, have united in doing honour to a British editor, Mr. James Dredge, of *Engineering*, by inviting him to deliver the address at the unveiling of the memorial erected to Alexander Lyman Holley, in Washington-square, New York. The address will be delivered early in October, during the New York meeting of the British Iron and Steel Institute. Mr. Dredge, it will be remembered, was one of the British Commissioners to the Paris Exhibition of 1889.

HAY'S HOP ALE ESSENCE

Is made from the Choicest Hops Grown.

HAY'S HOP ALE.

The New Aerated Beverage, with full flavour of the finest Hops, is a really appetizing Bitter Beer.

Aerated Water Manufrs. -
Mess Presidents - -
Club Stewards - - -

Are requested to try this Essence. They will find the HOP ALE it makes a most valuable addition, which once introduced will be eagerly ordered.

It is the most Appetizing Non-Alcoholic Beverage known, and will have an immense permanent sale in hot climates. See these testimonials:—

"A beautiful essence. Has a fine Hop Aroma and is quite a pharmaceutical triumph."—*The Chemist and Druggist.*
"HAY'S HOP ALE.—This is an excellent Non-Alcoholic beverage."—*The Lancet.*
"Aerated Hop Ale made from this essence is unrivalled for its peculiarly fine Hop Flavour and Aroma."
"Has the Hop Taste of Bitter Beer, and is a nearer approach to Bass' or Allsopp's Ale then any non-intoxicants preceding it."—*Eastern Morning News.*

Trade Price, 8s. 6d. per lb.; 12 lbs. & upwards, 8s.
QUANTITY REQUIRED, Two Fluid oz. to each Gallon of SYRUP, making 106 10-oz. BOTTLES.

W. HAY, Manufacturing Chemist, Beverley Road, **HULL, ENGLAND.**

HAY'S SOLUBLE ESSENCES

HAVE A WORLD-WIDE CELEBRITY.

Hay's Soluble Essence of Jamaica Ginger.
Hay's Compound Fortified Essence of Jamaica Ginger. For 1st quality Ginger Ale.
Hay's Ginger Ale Extract. For 2nd quality Ginger Ale.
Hay's Ginger Ale Essence, highly concentrated. For 3rd quality Ginger Ale.
Hay's Ginger Champagne Essence, highly recommended.
Hay's Soluble Essence of Messina Lemons.
Hay's Lemon Flavour.
Hay's Hop Ale Essence.

Spurious imitations are made, but the difference is so marked that no manufacturer using them can compete with one using Hay's preparations. Indentors, to prevent disappointment, should specify that the goods are to be of

BEETHAM'S GLYCERINE-AND-CUCUMBER

For INDIA and all HOT CLIMATES this sweetly scented emollient Milk is INVALUABLE
IT KEEPS the SKIN COOL and REFRESHED in the HOTTEST WEATHER,
Removes and prevents all SUNBURN, REDNESS, FRECKLES, TAN, etc., and
RENDERS the SKIN DELICATELY SOFT, SMOOTH and WHITE.
It entirely prevents it from becoming DRY and WRINKLED, and PRESERVES the COMPLEXION from the scorching effects of the SUN and WIND more effectually than any other preparation. The IRRITATION caused by the BITES and STINGS of INSECTS is wonderfully allayed by its use. For imparting that soft velvety feeling to the skin, this delightful preparation has no equal! Sold by all Chemists.

MOLLER'S COD LIVER OIL

Perfected in One Operation by the process invented by Möller in 1852, Incomparable, Palatable, Perfect, Pure,

Do not be induced to accept *any* other ONLY Möller's ever took 20 Prizes.

Be wary of recent Imitations! so extensively puffed now.

Is simply a *pure* OIL! it contains none of the 50-60 per cent. of water necessarily in emulsions—cheap commodities usually charged at THE PRICE OF PURE OIL.

Be sure you have *NEW* oil!
EVERY BOTTLE OF RECENT PRODUCTION HAS THE DATE PERFORATED ON BOTH LABELS.

"FOR THE BLOOD IS THE LIFE."

CLARKE'S WORLD-FAMED BLOOD MIXTURE

THE GREAT BLOOD PURIFIER AND RESTORER.

For cleansing and clearing the blood from all impurities, it cannot be too highly recommended.
For Scrofula, Scurvy, Skin and Blood Diseases, Eczema, and Sores of all kinds, it is a never-failing and permanent cure.

It Cures Old Sores,
Cures Ulcerated Sores on the Neck.
Cures Ulcerated Sore Legs.
Cures Blackheads or Pimples on the Face.
Cures Scurvy Sores.
Cures Cancerous Ulcers.
Cures Blood and Skin Diseases.
Cures Glandular Swellings.
Cures the Blood from all impure matter From whatever cause arising.

Clarke's Blood Mixture is the only real Specific for Gout and Rheumatic pains, for it removes the *cause* from the blood and bones.
As this mixture is pleasant to the taste and warranted free from anything injurious to the most delicate constitution of either sex, the Proprietors solicit sufferers to give it a trial to test its value.

"It is entirely free from any poison or metallic impregnation, does not contain any injurious ingredient and is a good safe, and useful medicine.—ALFRED SWAINE TAYLOR, M.D., F. R. S., Lecturer on Medical Jurisprudence and Toxicology."

"The Hon. Surgeon to His Excellency the Viceroy of India prescribes Clarke's Blood Mixture largely, and speaks highly of its efficacy in skin affections, &c. On this account we wrote asking if you could supply the Mixture for dispensing purposes."—Letter from A. John & Co., Druggists, &c., Agra, India, June, 1888.

West Cowes, Isle of Wight, September, 1888.
"Dear Sirs,—Through the merits of your excellent Clarke's Blood Mixture the large red pimples which covered my face are fast disappearing. For a long time I put up with the discomfort of these pimples thinking that nothing would do any good. At last I was persuaded to try your medicine, and now I have taken one bottle they are rapidly vanishing. It cannot be too highly recommended, and I am most grateful. I will tell all my friends about it, but they really do not require telling because they can see the difference for themselves. You may publish this if needful.—I am, gratefully yours,
"ISLA GERALDINE RIPON.

THOUSANDS OF TESTIMONIALS.

Clarke's Blood Mixture is sold in Bottles 2s. 9d. each, and in cases, containing six times the quantity, 11s.—sufficient to effect a permanent cure in the great majority of long standing cases. BY ALL CHEMISTS and PATENT MEDICINE VENDORS throughout the world. Proprietors, THE LINCOLN AND MIDLAND COUNTIES DRUG COMPANY, Lincoln, England. Trade Mark—"BLOOD MIXTURE."

CAUTION.

Purchasers of Clarke's Blood Mixture should see that they get the genuine article. Worthless imitations are sometimes palmed off by unprincipled vendors. The words "Lincoln and Midland Counties Drug Company, Lincoln, England," are engraved on the Government Stamp, and Clarke's World-famed Blood Mixture," blown in the Bottle WITHOUT WHICH NONE ARE GENUINE.

Digitized with financial assistance from the Government of Maharashtra on 19 June, 2017

MACROPOLO & Co., Cigar Merchants, Meadow street.

A WONDERFUL MEDICINE.

BEECHAM'S PILLS

BEECHAM'S PATENT PILLS. ST. HELENS LANCASHIRE

ARE universally admitted to be worth a Guinea a Box for Bilious and Nervous Disorders, such as Wind and Pain in the Stomach, Sick Headache, Giddiness, Fulness, Swelling after Meals, Dizziness and Drowsiness; Cold Chills, Flushings of Heat, Loss of Appetite, Shortness of Breath, Costiveness, Scurvy and Blotches on the Skin, Disturbed Sleep, Frightful Dreams, and all Nervous and Trembling Sensations, &c. The first dose will give relief in twenty minutes.

Every sufferer is earnestly invited to try one box of these Pills, and they will be acknowledged to be

WORTH A GUINEA A BOX.

For females of all ages these Pills are invaluable, as a few doses of them carry off all humours, and bring about all that is required. No female should be without them. There is no medicine to be found equal to Beecham's Pills for removing any obstruction or irregularity of the system. If taken according to the directions given with each box, they will soon restore females of all ages to sound and robust health. This has been proved by thousands who have tried them, and found the benefits which are ensured by their use.

For a Weak Stomach, Impaired Digestion, and all Disorders of the Liver, they act like magic, and a few doses will be found to work wonders on the most important organs in human machine.

They strengthen the whole muscular system, restore the long-lost complexion, bring back the keen edge of appetite, and arouse into action, with the rosebud of health, the whole physical energy of the human frame. These are FACTS testified continually by members of all classes of society, and one of the best guarantees to the Nervous and Debilitated is, BEECHAM'S PILLS *have the Largest Sale of any Patent Medicine in the world.*

Beecham's Magic Cough Pills

As a remedy for Coughs in general, Asthma, Bronchial Affections, Hoarseness, Shortness of Breath, Tightness and Oppression of the Chest, Wheezing, &c., these Pills stand unrivalled. They are the best ever offered to the public, and will speedily remove that sense of oppression and difficulty of breathing which nightly deprive the patient of rest. Let any person give Beecham's Cough Pills a trial, and the most violent Cough will in a short time be removed.

The Natives of India will find **Beecham's Pills** the finest medicine ever introduced to their notice; the English residents also will find them of great value for Cooling the Blood: as for throwing off Fevers and preventing inflammations in hot climates, they stand without a Rival.

Notice.—Messrs. NAYLOR, SON, GRIMES & Co. will forward, on receipt of letters, Sample Boxes of the Pills at the following rates:—

9½d. size, 9 annas per box; 1s. 1½d. size, 14 annas per box; 2s. 9d. size, 2 Rupees per box. These rates do not include the cost of postage, which will be added to the amount.

Chemists and Storekeepers can obtain the wholesale Rates on application.

Prepared only by the Proprietor, Thomas Beecham St. Helens, Lancashire, England—in boxes 9½d., 1s 1½d., and 2s. 9d. each, with which full directions are given.

Sold by all Druggists and Patent Medicine Dealers everywhere.
